Your telephone is part of a vast interlocking system now carrying an abnormal wartime load. Don't let needless delays hold up messages on which production efficiency may depend.

### OTHER "WARTIME TELEPHONE TACTICS"

- BE SURE you have the right number... consult the directory.
- ANSWER promptly when the bell rings.
- BE BRIEF. Clear your line for the next call.
- USE OFF-PEAK hours for your Long Distance Calls.

These things may look trifling, but on 6,500,000 daily telephone calls, they are very important.

#### Advise Farmers to Repair Bags

Farmers and others handling produce contained in jute and cotton bags would be well advised to carefully collect, clean and mend every available bag. The supply is limited and every care should be taken of those on hand. To avoid damage by rats and mice to bags in storage, it is suggested that they be hung over wire in a dry location a considerable distance from walls and floors. Used bags may harbor and spread various plant disease, so disinfection is recommended if one is doubtful regarding the cleanliness of bags to be used. They may be dipped in a solution of formalin one pint to 30 gallons of water for a period of three to five minutes.

There is a scarcity of tin to be used in the manufacture of tin cans, and this fact is having peculiar results. It is spoiling the market for old worn out horses. Farmers who recently shipped horses too old for farm work to Toronto had them returned at additional cost. Scarcity of cans had killed the market.

The church was suitably draped with Union Jacks and the Royal Air Force Ensign.
