Pretty Wedding at Gormley Farm

The home of the bride's mother, Gormley, was the scene of a pretty wedding on Saturday, April 18th, at 4.30 in the afternoon when Verna Irene, youngest daughter of Mrs. and the late Jos. L. Cherry became the bride of Douglas Lloyd Jones, only son of Mr. and Mrs. Leslie Jones, Lansing. The bride was given in marriage by her only brother Joseph of Upper Canada College and the ceremony was performed by Rev. I. Brubaker, of Gormley. The wedding music was played by Miss Doreen Gooding. The house was beautifully decorated with pink roses and bouvardia and tall standards of calla lilies and white stocks formed a background for the bride and groom and their attendants during the ceremony. The bride was becomingly gowned in a white gown with long full skirt of net trimmed with a design of satin, a satin basque with sweetheart neckline fastened with a long row of satin buttons down the front and pointed sleeves trimmed with satin buttons. Miss Florence Cherry, sister of the bride, was bridesmaid, wearing a gown of pink sheer trimmed with silver and carrying a bouquet of Johanna Hill roses and white bouvardia. Shirley Gray, Gormley, niece of the bride, was flower girl and wore a long dress of pale yellow silk trimmed with blue velvet beaus and carried a nosegay of sweetheart roses, forget-me-nots and pansies. Mr. Harvey W. Rumble, of Toronto, assisted the groom.

For travelling to Montreal and other points the bride wore a pale blue Redingote with navy top coat, hat and accessories, and a corsage of red roses. They will live in Toronto.

FAVOR HYBRID CORN

With seeding well under way the farmers are now wondering what type, or strain of corn to order from their local seed dealer. According to one merchant who sells seed throughout York County, about 80 p.c. of the farmers will plant Hybrid corn this year. Since many will be planting this corn for the first time this year, the question of suitable strains is causing some concern.

In 1941 the County Crop Improvement Association conducted tests in various parts of the county and the average yield of green weight at harvesting was approximately 3 tons more per acre than the old standard varieties with over 3/4 of a ton more of ears. The seedsmen of the county were invited on a tour to inspect these plots and their impression was borne out by the yields.
