When Stouffville council learned at their regular meeting last Thursday that an ordinary suit of clothes cost \$1,500 over in unhappy Greece, everybody agreed there was some excuse if that country adopted the wearing of the fig leaf once again. Mrs. Lett gave up housekeeping fourteen years ago and since that time her goods were carefully stored under the parental roof. There wasn't a speck of dust on any of the dishes or other articles disposed of, but then everybody knows that Mrs. Watson doesn't have dust in her home, so folks who came to buy got excellent articles in splendid condition. CHAIN STORES SET EXAMPLES

A few independent stores have curtailed advertising, and in explanation they say they haven't the goods to sell. We quite realize that the merchants' shelves are not stocked like they used to be, but is there not real value in keeping their name before the public? We notice the big chain stores are increasing rather than decreasing in their advertising. When they have little merchandise they use their space to promote victory loans, victory gardens and other worthy projects. Thus they are on solid ground. These big organizations know that publicity in any form is going to react to their advantage. They know that Mr. Public, who is attracted and influenced by their smart advertisements, is going to have a feeling of gratitude and good will towards the sponsor of the advertising. That is only logical and that is why every merchant should keep his name before the public.

FAT IS AMMUNITION!

Fat and bone conservation begins at home and ends in the firing line

- DO YOU KNOW -

One pound of fat supplies enough glycerine to fire 150 bullets from a Bren gun. Two pounds of fat will fire a burst of 20 cannon shells from a Spitfire or 10 anti-aircraft shells.

Bones produce fat and aircraft glue.

If we saved fat at the rate of one ounce per person per week this would mean 36,000,000 pounds per year, enough to produce 3,600,000 pounds of glycerine for explosives.

OUR FIGHTERS DEPEND ON YOU

"Every householder who delivers to a retail butcher, collector, or Salvage Committee, any rendered or unrendered fats or bones shall be entitled to receive from the person to whom they are delivered 4 cents per pound net weight for rendered fats, and 1 cent per pound for unrendered fats."

The above paragraph is a direct quotation from Order A-642 of The Wartime Prices and Trade Board.

"Rendered fat" means fat melted down and strained to remove solid matter. It includes drippings and strained pan grease resulting from the cooking of meat.

"Unrendered fat" means raw or partially cooked fat free from lean meat and bone, but not fully rendered.

"Bones" means raw or cooked bones of cattle, sheep and hogs.

EVERY OUNCE COUNTS!

SAVE AND STRAIN EVERY DROP TO SPEED VICTORY. SELL IT TO YOUR BUTCHER OR GIVE IT TO YOUR SALVAGE COMMITTEE.

NOTICE TO BUTCHERS, HOTELS, ETC.

You have been mailed a copy of Order A-642. This Order affects operators of hotels, restaurants and other establishments where meals are served. It is of immediate importance to butchers and slaughterers. If your copy has been lost, you can obtain another from the nearest office of The Wartime Prices and Trade Board.
