From his letter it is apparent that Dick has had some very interesting and exciting experiences. The entire crew of the bomber in which he is serving is twenty-one years and under. All are Canadians and westerners except Dick who is becoming as breezy as any westerner.

LIVE POULTRY HAS CEILING

Strong protests are being received by the Price Board from poultry producers who point out that while consumers are paying full ceiling prices for dressed poultry, producers are receiving lower corresponding prices for live poultry.

"It should be emphasized that the Board has also set maximum prices for live poultry," said F. S. Grisdale, deputy foods co-ordinator. "When the prices of dressed poultry to the public are at the ceiling, it is naturally expected that producers should be receiving the live ceiling for their quality birds at their poultry dressing centre," he explained.

Ceiling prices for the main lines of live poultry in Ontario for November are: Chickens (roasters and fryers) live birds more than three lbs. 28c.; fowl (old hens) all weights live birds, 23-3/4c.

THE CHARTERED BANKS of Canada keep abreast of the Dominion's expanding needs.

Six times since 1870 the Bank Act under which the Chartered Banks operate has been revised by parliament—six times in that period the activities of the banks have been carefully scrutinized by the people's representatives.

Every ten years the Bank Act has been thus revised. Each one of the six decennial revisions has contributed much to the evolution of the banking system to meet the expanding needs of a developing Dominion.

In 1934 the sixth revision of the Bank Act was made. Fifty members of the House of Commons

made up the committee, which examined witnesses—among them bank officers; government officials and reformers—and studied exhibits filed by various individuals and organizations. Findings were submitted to the House, and later that year the Bank Act was revised in many important particulars.

Through democratic enquiry and decision, the Canadian banking system has grown and been adjusted to meet the needs of the people, providing a depositary for savings and a sound basis for Canada's free economic development.
