Birkett Curly in Milwaukee for Toronto.

Milwaukee may be famous for its beer, but we now learn it is a famous curling centre in mid-winter. Last week when attending a bonspiel in Toronto, our insurance broker Thos. Birkett was one of the granite throwers and when a Toronto rink was slated to move off for Milwaukee for a series of games and found themselves one man short, the sturdy insurance prince was invited to go along. Accepting the invitation he set about to get his picture taken, procure a birth certificate, three letters from friends vouching for his good citizenship, a promise to return forthwith after the ice powwow, attended a few other details, that would be necessary to get him smoothly over the border enroute to Milwaukee. We hear that the Canadians made a good showing, down in the Wisconsin state, and Stouffville is proud to have been represented on the curling line-up.

When is a Dollar Not a Dollar?

When it won't buy a dollar's worth of goods! For instance, compared to present-day standards, your dollar of the last war was worth, not a dollar... but sometimes less than 50¢... Housewives, who went marketing in 1917, had to part with \$1.00 for a four-pound jar of jam which you buy to-day for 50¢... Dad's winter underwear set him back \$10.00 then, as compared to the 2.00 he could buy it for to-day! You get a lot more for your money NOW... because price ceilings and other anti-inflationary measures have kept the value of your dollar HIGH! That's why it will pay you to see that selfish spending never undermines price control in Canada. Remember, you protect your dollar's worth when you use your money wisely when you pay off debts... refuse to buy needless luxuries... give black markets a wide berth... and don't hoard goods.

Make This Pledge Today!

I promise to give my support to keeping the cost of living down. I will buy only what I need. I will observe the ceiling whether buying or selling goods or services. I will pay off old debts, save for the future, invest in Victory Bonds and War Savings Certificates. And I will support taxes which help lower the cost of living.

Keep Your Dollar Value High!

Before you blame your telephone...

CHECK THIS DISTANCE

Engineers designed the mouthpiece of your telephone to give best results at one-quarter of an inch from the lips. When your lips are farther away than this, your voice is transmitted less strongly... less clearly.

Failure to remember these simple facts accounts for the great majority of "trouble" reports.

Help avoid needless service check-ups, and at the same time let those you talk to hear you without strain. Just remember: Talk clearly, normally, directly into the telephone, with your lips just one-quarter of an inch from the mouthpiece.

On Active Service

Giving Wings to Words

Smoking while you talk may cause distorted reception. It also prevents your holding the mouthpiece directly in front of the lips.

If you need to reach across your desk as you talk, continue to hold the telephone in correct position, close to the lips.

A wall set can't come to you; stand off so that your lips are directly in front of and close to the mouthpiece. Don't talk across it.

For clear noise-free transmission, always keep your desk telephone upright - not at an angle or near the horizontal position.
