

Toronto - Goodwood FLASHES

Old timers around Goodwood, Mr. and Mrs. Geo. Lee of Toronto, were at Port Bolster last weekend on a holiday, while Mr. and Mrs. Alex Brown visited in Goodwood.

Miss Ronde Jean Sheppard of Toronto, has been visiting her grandmother Mrs. Byam just north of Goodwood.

Mr. and Mrs. Scott of Toronto, spent a week with Mr. and Mrs. Ted Hall.

Miss Grace Latcham is taking the summer course for teachers, so is in Toronto for six weeks. She will teach at Severn Bridge.

Mr. Walter Davey was in Stouffville to see brother Edward who is improving in health; we are glad to say.

William Davey, Ottawa, John Davey, Mount Abert, and Peter and Walter, were all expecting to be in Goodwood for the 12th. John Davey is giving up housekeeping at Mount Abert and his auction sale is being advertised in this issue for July 15. We are seeking a home on the farm for one month for a 15-year old boy, a good worker, but not a farm boy. If any reliable farmer will contact us we will be glad to go into the matter, giving all details about the boy.

The absence of rain is having a serious effect on crops in the Township of Uxbridge. While a bumper hay-crop is just about finished off, the root crop is becoming withered and if there is no rain before this item is in print the situation will be almost drastic. All eastern Ontario is in a state of drought from Oshawa, while western Ontario is suffering from a lesser degree. Seems as though central Ontario has been most fortunate in bringing things along as we have. We got a good drenching down in Toronto on Sunday and we couldn't help but be sorry that the much needed moisture hadn't fallen on more fertile land.

That was certainly a swell book gotten out by L.O.L. No. 572 to commemorate the 12th of July at Goodwood. What a splendid response from merchants everywhere, indicating that the lads of Goodwood stand in very high favor. Stouffville merchants were the biggest advertisers, but Uxbridge was well represented also. Claremont and local merchants.

PROMOTIONS S.S. 17, MARKHAM

From Grade VIII
Mary Grove (Farm Service); Kenneth Jones (Farm Service), Shirley Hoover, Doris Redshaw.

To Grade VIII

*Arthur Byer, David Schmucker, Ruth Reesor, Ross Breuls, Margaret Brignall, Lorne Lyon.

To Grade VII

*Anna Grove, *Jacob Grove, *Betty Wideman, Willard Moyer, Phyllis Breuls, Frances Grove, Bruce Brownsberger.

To Grade VI

*Shirley Steckley, Eldon Jones, Murray Redshaw, Grace Schmucker.

To Grade V

*Pearl Grove, Shirley Schell, Joyce Hallman, Given Breuls, Mildred Grove, Joseph Grove.

To Grade IV

*Arlene Breuls, *Ona Hallman, Ronald Payne; Dorothy Grove.

To Grade III

*Patricia Grove, *Graham Frisby, William Ross, David Grove, James Hollingsworth, Irene Olskevski.

To Grade II

*Albert Grove, Ivan Grove, Lorne Grove, Gordon Kirk.

*Indicates Honours.

Luelia A. Stouffer, teacher.

competitor in the production of maple sugar and maple syrup is the United States....commercial failures were at a lower level in the first quarter of this year than for any similar period since statistics were ever "tabulated" by the Bureau of Statistics....loose unemployment insurance stamps destroyed by fire while in possession of employer will not be replaced by the Dominion government; if they are only partially burned and can be identified, okay....the 15,218 firms reporting to the Bureau of Statistics at the beginning of April reported an aggregate working force of 1,882,322 persons, of whom 507,575 were females and 1,374,747 were males.

Just a brief scan of the Sixth War-time Budget as brought down by Finance Minister Isley. Basic income tax rates are unchanged, but compulsory savings are off as of July 1st, while farmers benefit by the cutting off of existing traffic and of the war exchange tax on farm machinery and implements. Income tax concessions include one which now exempts any child dependent on a taxpayer, whether his own or not. Medical expense deductions, now include those incurred outside of Canada. The Prices Board also clears up a point with the warning that any reduction in laid down costs through this measure, on agricultural equipment and repairs, must be passed on to the consumer.

Weekly Consumer Branch item: Some Canadian mothers are finding that the 30 fluid ounces of corn syrup which they can get each month with their baby's preserves coupons is not enough for the baby's diet needs. The answer is that mothers can exchange the baby's sugar coupons at the Local Ration Board, receiving two preserves coupons for every sugar coupon.

When the final report was made of the House of Commons Sub-Committee on Post-war problems of Women, there was an interesting section on farm women and there were recommendations in regard to electrification of the farm home, farm housing, provision for a plentiful supply of running water, etc. One striking recommendation will be of interest to our rural readers. It listed a number of remunerative enterprises in agriculture, such as mushroom culture, dehydration of fruit and vegetables, boarding houses and other projects which might attract young women back to the farm. Where necessary it was recommended some sort of assistance to be given to help establish young women in small enterprises.

Do you know that the total tonnage of Canadian coins struck by the Royal Mint in 1943 was 1,050 tons, four hundred more than the year before? Operating on a 24-hour a day schedule, seven days a week, they turned out 3,000,000 coins each week. The mint produced 500,000 coins in the past five years, of which 329,000,000 were one-centers. That's something to tell the kids and make their eyes pop.

When Munitions Minister Howe told the House of Commons that there is no immediate prospect of gasoline curtailment, but if the invasion became a long, protracted struggle there might be, he had figures to back him up. He indicated that it takes two thousand gallons of fuel to move an armored division one mile; a fleet of 5,000 bombers and escort fighters raiding Germany uses up some 5,250,000 gallons of aviation gasoline. In one 30-day stretch the R.C.A.F. in Canada and Newfoundland used up an average of 548,000 gallons a day.

There was some decrease shown in juvenile delinquency in the Dominion during 1943. The number of juveniles brought before the courts was 12,225 as compared with 13,802 in 1942. Yet that was still 28.7 greater than reported in 1939-41. The wartime juvenile problem is accentuated and needs more attention than ever.

AUTOPSY ORDERED IN CHILD'S DEATH

An autopsy has been ordered in the sudden death of nine-year-old Margaret Jane Greenshields, only child of Mr. and Mrs. John Greenshields, Scarborough. The child, staying at Cedar Valley Camp, Whitby, took sick early Thursday last and died in the ambulance outside Richmond Hill on the way to the hospital for Sick Children.

Keenly interested in swimming and other camp sports, Margaret was spending her third summer season at Cedar Valley Camp. Said her father last evening: "Margaret was the picture of health when she left home last Friday evening. The doctors do not seem to know the cause of her death. There will be an autopsy". She attended Courcellette Road Public School, Scarborough.

Marmill GROWING MASH

ANALYSIS: Protein 15%, Fat 3%, Fibre 7%

• growing mash plays an important part in the feeding of poultry. It is the connecting link between the feeding of a baby chick and a laying pullet, and, as such, must carry on from where the starter ration left off and fit the bird for the long, continuous high production in the fall and winter.

Marmill Growing Mash is the connecting link on many hundreds of farms. This mash, made up of only carefully chosen, high-quality ingredients, and manufactured and balanced to give the highest possible digestibility of ingredients, will give your pullets the strong, well-developed bodies and large start laying at six months of age and continue through the winter.

The MARMILL WAY is the BETTER WAY OF FEEDING.

Bible Questions and Answers

Question—Will a man who has been married more than once live with all his wives in heaven?

A.—This inquirer has asked the same question that the Sadducees, who denied the resurrection, asked Jesus—only they asked whether a woman who had seven husbands would live with all of them in the resurrection. We simply reply in the words of Christ: "Ye do err; not knowing the Scriptures, nor the power of God. For in the resurrection they neither marry, nor are given in marriage; but are as the angels of God in heaven." Matthew 22:29,30.

Q.—What is the difference between the "Saint James version of the Bible" and the "Revised Version"?

A.—There is no "Saint James version". King James I of England authorized the translation of the Bible into English, and it was published in 1611. Hence our common version is often called the "Authorized" or "King James" Version. The American Revised Version appeared in 1901 with some of the old English words modernized. Of course, many newly discovered manuscripts were available when this revision was made, but all the great doctrines of the Bible are the same in both versions.

Ready to serve . . . 24 hours a day

● In the early days of commercial flying, hours of daylight were far too short. The mantle of night automatically cancelled flying schedules. But . . . because electrical engineers discovered ways and means of flooding runways with light . . . swift couriers of the air tonight are cutting hours of time, carrying precious burdens of humanity and vital correspondence that may mean the saving of thousands of dollars before tomorrow's workday has been completed.

Electricity has not only helped to make flying economically sound, but, with the aid of modern electronics, flying is safer. Today . . . tonight . . . airplanes are guided safely, surely, on their course by a beam of electrical waves which electronics made possible. In every field of endeavor, as in the field of aviation, electricity stands ready to serve 24-hours a day.

The development of electrical devices in the field of aeronautics is but one indication of what lies ahead for the world of tomorrow. In the electrical field it can be truly said . . . the best is yet to come. Electricity is the servant of mankind. In commerce . . . in industry . . . at home and on the farm . . . it lightens our tasks, makes life more comfortable. Plan now and save the benefits that electricity can bring you.
