Facts for Canadians: According to the September issue of Canada at War Canada's war expenditures since 1939, including the estimates for the fiscal year 1943-1944 and the budget forecast for 1944-45, total more than \$15,000,000,000, an average of more than \$1,300 for every Canadian. The total war expenditures for the five fiscal years ended March 31, 1944, were \$10,550,000,000 and the ratio of revenues to these war expenditures was: all income taxes—38.2%, all tax revenues 69.5% total revenue 76.7%.

In the last five years, while the nation's funded debt has increased slightly more than three times, the share of the debt payable outside Canada has fallen from 28% to scarcely more than 3%. The war-time borrowing has been distributed so widely that the interest on the public debt is paid to probably not less than 60% of the income-earners of the country.

## HIT BY U.S. BOMBS

His arm in a sling, Maj. Gen. R.F.L. Keller, C.B.E., commander of the Canadian 3rd Div. which landed in France on D-Day, is pictured in his room aboard the hospital ship, Lady Nelson, which docked at Halifax. He was wounded in the arm and body by U.S. bombs. His wife resides in Victoria, B.C.

Since the commencement of packing in 1940, the plants of the Canadian Red Cross have packed 12,183,202 food parcels for British and Allied prisoners of war in enemy hands.

of the armed forces granted special harvesting leave, and the services of the 92 women from the Civil Service in Ottawa, the big crop came off in record time.

The 7th Victory Loan opened last week. The symbol of this Loan is a replica of the shoulder-sleeve insignia of the Supreme Headquarters Invasion Staff, and shows a flaming sword against a field of heraldic sable (black) representing justice bringing liberation over the darkness of Nazi oppression. At the top of the actual shield is a rainbow emblematic of a state of peace and tranquility, the restoration of which to the enslaved peoples is the objective of the United Nations.

Overseas, our boys are already over-subscribing their objective. That is the spirit which should be reflected here at home. Remember you are lending—not giving, so buy to the fullest extent of your ability.

Do you know that since the war began vegetable seed production in Canada has become a relatively important industry? Prior to 1939 most of the field root and vegetable seeds used in Canada were imported from European countries but when these countries were invaded and occupied by Germany home production became a necessity. With the assistance of the Department of Agriculture Canadian-grown seeds are now even a higher quality than those grown previously in Europe and are produced in sufficient quantities to meet all domestic needs.

ion mats, covering for guns and planes and other essential products. Even the small amount remaining in Canada has its manufacture restricted to wartime uses.

Through the work carried on by the Dominion Experimental Farms Service the Canadian producer has received guidance and help in improving the quality of the product and increasing the yield. When the war ends the needs of civilians will create a new demand for fibre flax. However, then there will be competition from producers in other countries, so to hold the market the Canadian farmer will need to continue raising the quality of his product.

Recent appointments to the Bench change the standing somewhat in the House of Commons. The Liberal membership, out of a total of 245 seats in the house, is 161. The Progressive Conservatives—39; Co-operative Commonwealth Federation—10; Social Credit—10; Others—14; vacancies—11.

A report issued by the Department of Labor, Ottawa, shows that there was a good response to the appeal for farm workers to go west to help take off the crop. Some 6,470 east farm workers responded—an increase of 75% over 1943. The earlier crop in eastern Canada, of course, was responsible for the availability of these workers. There were 5,400 harvesters from Ontario and 1,022 from Quebec. Of these Manitoba got 1,143, Saskatchewan 3,624 and Alberta 1,703. With the help of these eastern farm workers, the assistance given by members

shown in the number of cattle on farms in Canada. The total of 10,346,000 is an increase of 7% over the previous year, with the greatest gain being shown in the province of Saskatchewan where the figures are up 18%. Of these 10,346,000 cattle, milk cows account for 3,930,000.

Horses declined by 40,000 showing a population on farms of 2,735,000. Sheep were up 8% with 3,726,000. Hens and chickens went up 18% with a total of 86,792,000.

Weekly Consumer Branch item: With rainy weather and colder days now, it is interesting to hear that the use of the new waterproof plastic sole has been extended to adults' shoes. At first "Visole" was confined to manufacture of 'kiddies' shoes. With so much leather going into boots for the armed forces, and with the heavy demands for every scrap of leather, manufacturers have found it difficult to meet the civilian footwear demands, so it is felt that visole will now help supply the needs. Shoes with the new plastic soles cost only a little more than those with ordinary leather soles and experiments show that they last longer. Materials going into the manufacture of visole are all-Canadian—limestone, coal, salt and water. That ought to recommend it!

This year's commercial production of fibre flax in Canada covers about 40,000 acres with an estimated value of four million dollars. Most of the fibre goes to Britain, there spun into thread and yarn for making parachute cords, collis-

## A WEEKLY EDITOR LOOKS AT Ottawa

Written specially for the weekly newspapers of Canada  
 The kid from your own neighborhood is in it; the fellow from Sydney, N.S., from Alomone, Ont., from Red Deer, Alberta, also. On October 6th the first official history of this war appeared in bookstores. It's "The R.C.A.F. Overseas. The First Four Years." No fiction about this book; but the names and deeds of our country's flying heroes—the young lads to whom the British Isles, Europe and North Africa were yesterday no more than colored blotches on the map. Recording officers have been busy for a long time compiling the activities of RCAF units, and for absorbing, interesting reading this book is a "must."

When the tally was completed as at June 1 last, a new high was

*"We must plow to the end of the furrow.."*

● That old saying, so well known to farm folks : : "Plow to the end of the furrow" : : so aptly makes our duty plain. And the end of the furrow is beyond the horizon.

Our men on the fighting fronts have weary, trying days ahead of them. We, on the home front, must not waver nor falter. Our duty is clear, *we must keep faith with our fighters.* On Canadian farms we must maintain our efforts to produce the foods our fighters and our allies need. That work will reward us with increased incomes.

And we must *save* . . . to have money to *lend* to our country to pay the increased costs that this war continues to pile up.

Money invested in Victory Bonds will help to buy the tools of war. They don't last long in action; they must be replaced. It's our job : : the home front job : : to see to it that our fighting men have everything they need.

Victory Bonds yield a double harvest. They provide our country with money to carry on the war; later, they will provide money to buy things we will want and need, and which we have done without during the war. Victory Bonds will provide cash to pay for improvements for farm and home . . . new buildings . . . new machinery ; ; ; better stock . . . new car ; ; ; furnishings and conveniences for the home.

BUY VICTORY BONDS WITH MONEY IN THE BANK  
 BUY MORE . . . ON CONVENIENT DEFERRED PAYMENTS

Victory Bonds pay double bank interest—3%. Buy Victory Bonds with your savings. You can also buy Victory Bonds on convenient deferred payments. Pay 10% when you order the bonds and the balance any time over a period of six months.
