Many Property Changes in District

There has been a small boom in the real estate business around Claremont in the past few weeks. Mr. Thos. Sanderson has disposed of his 16-acre place just north of the village, on the Brock Rd. at the corner of the Uxbridge-Pickering townline. The new owner is Bill Hicks recently returned from overseas. The sale price is reported at \$2800. Mrs. Andrew Wilson has sold her home just north of the Sanderson property which consists of a house and about four acres of land, to a Toronto party; Mrs. Wilson will make her home with her daughter, Mrs. Martin Gall. Farm property sales are also reported in the area, including the Waddell farm to Fred Murray, returned soldier, the Jos. Nokes place and Elwood Carruthers farm, all east of the village.

Record Shipment of Ayrshires from Ontario County

A transaction of major importance in the livestock field was completed recently with the purchase by Idaho breeders of 17 head of purebred Ayrshires from Hermitage Farms, Pickering. The cattle completed their 2,500 mile trip to the United States last week.

Hermitage Farms, operated by E. L. Ruddy and Son, are the largest breeders of Ayrshire cattle in Canada and were premier winners at shows in Ontario and Quebec last year. On the 800-acre farm are 275 head of registered Ayrshires of which 120 are milking. Approximately two tons of milk a day are shipped. A total of 122 head were sold last year of which 76 went to the United States.

Prior to the making of the shipment to the State of Idaho, which was the largest shipment on record of purebred cattle to that state, there were only two herds of registered Ayrshires in the state comprising a total of 20 head. The purchasers were represented by Herbert L. Ghndeman, B.S.A., of Bonny Ayre Acres, Pocatello, Idaho, who spent seven days in Pickering making a careful selection. The owners of Hermitage Farms are justly proud that Idaho interests should come such a long distance and to this farm to make their purchases.

DO FARMERS WANT ARMY TRUCKS

The Ontario Federation has requested the War Assets Corporation to make available to agriculture, used military trucks. This has been done and with the co-operation of the W.A. Corporation trucks are soon to be available for Ontario farmers. It will be up to the County Federation to ascertain the number of trucks required. To facilitate this the W.A. Corporation is preparing a pamphlet showing the type of trucks available, with specifications. Included in the pamphlet is a blank form upon which the farmer can indicate the type of truck he requires and return the blank to the County secretary. In this way it will be possible to determine the number required in each part of the province. These pamphlets will soon be available. These are preliminary plans to secure trucks. Prices and plans to simplify distribution of the trucks will be announced later.

Councillor Dalton Rummey of Victoria Square is York County president of the Federation.

"HARDWARE DISEASE" COMMON IN CATTLE

Besides the danger of poisoning of cattle through old bones being left around pastures and live stock lots, there is another disease which occurs almost entirely in cattle as a result of untidy surroundings. This is known as "Hardware disease" and is occasioned by the common habit of cattle eating nails, staples, pieces of wire, and other sharp metal objects which they find in pastures and elsewhere around the farm. This assorted hardware often penetrates vital organs, sometimes with fatal effect.

Though not contagious in the usual sense of the word, "Hardware disease" is transmitted through carelessness, according to many veterinarians. They state also that in dairy cattle the losses from "Hardware disease" exceed those from any one contagious disease. Prevention consists in keeping pastures, feedlots, fence corners, and all other parts of the premises free from small pieces of sharp metal.
