#### Now the Best Milker Has Been Made Better!

Look at these improvements that have been made in McCormick-Deering Stationary and Portable Milkers:

New claw, shells and inflations are shown in this view of McCormick-Deering teat cup cluster.

- Alternating action or single action.
- New sanitary claw with "straight-through" design.
- New beadless teat cup shells and new inflations.
- New seamless wide-mouthed pail—drawn from one piece.
- All metal touching milk is stainless steel.

This single unit with 50-lb. post has pulsator and double air hoses for alternating action.

For more and cleaner milk—and more time and leisure for yourself—use the McCormick-Deering Milker. Stop in and see it on display.
