parents Mr. and Mrs. Crosier.
Congratulations to Audrey Slack,
on her ability as a public speaker.
On Wednesday afternoon twenty-
two girls of The Live Wires Club
were on a trip to Brooklin to visit
the flour mill. They were divided
in groups and the miller showed
and explained to them all the vari-
ous processes from where the
wheat is emptied in the bin till it is
manufactured into flour. The girls
enjoyed the hospitality of Mr. Wil-
son, the miller, as he was very
liberal with his time and all thank-
ed him for the information they
received.

all.

THE MIXING BOWL

By ANNE ALLAN
Hydro Home Economist

Hello Homemakers! It is garden-
ing time. Time and money spent in
gardening is good insurance. This
year you will do well to see that
you get healthful recreation and an
ample supply of fresh produce from
your own plot. It's true every mus-
cle will ache after the first day's
gardening, but if the whole family
take their exercise, it will be a
mutual benefit. Then, when the
radishes, green onions and lettuce
are ready, the pleasure of eating
will be appreciated by everyone.
A plan sketched on paper will be
necessary if there is to be more
than one person handling the rake
and hoe.
In many parts of Ontario, this is
seeding time. Gardens are now
out, fertilized and ready to be
planted, but there is lots to do yet.
We suggest you pick up another
copy of Gardening from the De-
partment of Agriculture and read
it over again—a bulletin on
Garden Insect Protection.
Here are a few tips worth con-
sidering too:

- To extend the season of such
crops as beans, peas and corn,
two or three sowings may be
made at intervals of 10 days to
insure successive crops. This
also applies to lettuce, radishes,
spinach and betts. Remember
when you are planting that a
crop of radishes begins to go to
seed in 8 or 10 days. Say to
yourself, can we eat all the
radishes from these seeds in
one week?
- Good seed can be obtained from
the local seedsmen but beware
of thick sowing! It wastes seed
and increases the labour of
thinning. Small seeds can be
sown by tearing off a corner of
the envelope, holding the
packet horizontally and gently
tapping it as you move along
the drill.
- To make a straight trench or
seedbed, stretch a line of cord
tightly as a marker.
- To mark rows of slow germinat-
ing seeds such as carrots and
betts, plant an occasional
radish seed in the row. This
will come up quickly and act
as a marker.
- Follow instructions as to the
depth seeds should be covered
and press earthy firmly over
them.

CANNING RHUBARB
Wash and cut stalks of rhubarb
in 1/2 inch pieces. Pack into sterile
jars and pour cold water into fruit
until jars are full. Seal with sterile
tops. Wrap jars in newspaper and
store in a cool, dark room.

RHUBARB SAUCE
Wash and cut rhubarb in small
pieces. Add 1 cup sugar for each
quart of rhubarb. Heat slowly and
cook a few mins. to "saUCE" con-
sistency. Pour into sterile jars and
seal.

THE QUESTION BOX
Miss G.R. asks: What are the
proportions of soda and water used
for cleaning silver?

Answer: For each quart of water
use 1 tsp. salt and 1 tsp. baking
soda in an aluminum pan (not tar-
nished). There should be enough
water to cover silver. Heat until
tarnish disappears, about 10 mins.
Then wash in soapy water and dry.
Mr. T. J. asks: How to clean
wooden bake table with oil spilled
on it.

Answer: Pour cold water on
bake table to harden oil, sprinkle
with flour to absorb excess; then
scrape and scrub with the grain
using hot water and soap. Rinse
well and dry thoroughly.

Mrs. G. M. says: Earth packed in
a tin bake pan for 2 wks removes
rust. (Yes, scouring wears off
tin).

Mrs. M. J. says: I've discovered
that a box of matches stored in one
end of silver drawer tarnishes the
silver. (Yes, that is true, matches
and rubber bands should be kept
away from silver.)

vacation at Gormley.

**HEAVY BEE SHIPMENTS;
BIG MONEY CROP LIKELY**
Honey producers in Manitoba,
Saskatchewan and Alberta are
going to have one of their biggest
years on record in 1946 if the all-
time level of bee shipments to the
three provinces by the Canadian
National Express can be taken as
an indication. Shipments are nearly
double the average of previous
years.
The movement or package bees
from the southern United States to
Prairie producers has been under-
way for two weeks and the ship-
ments, which are now at their peak,
will continue until early in July.
A new high record for daily ship-
ments was established last weekend
when three full carloads of bees
were sent from Winnipeg to prairie
producers.
Honey producers say that the
heavy imports are due largely to
the fact that the war import tax on
bees has been removed.
