Union Church
JUNE 16th-30th**

Each Week-Night Except Saturday
at 8 O'Clock

Sundays 7.30 p.m.

Evangelist

**Marshall
WINGER**

of St. Ann's, Ontario

God's People are invited to join with us in this series of meetings for the advancement of His Kingdom.

HALIBURTON MAN'S SAWING MACHINE ACCLAIMED

A Haliburton man has invented a new-type of sawing machine which may revolutionize the industry. The inventor—Ross Curry—says it will cut 30 cords of cordwood, in stove lengths, a day, just as easy as falling off a log. And that isn't all. The machine will cut a cord-wood stick in three or four pieces in one operation and place the blocks wherever they are wanted, inside or out. What is even more amazing it only requires one man to operate it.

The machine was built by Mr. Curry from used saws, belts and scrap metal. A crowd of spectators who gathered to watch the first demonstration was astounded at its efficiency.

His main worry now is how to keep the machine supplied with wood to cut. Moving from place to place won't present any difficulty, since the machine is powered just like a truck and can travel with as much ease.

OFFERED \$500 FOR 2-HEADED CALF

A calf born on the Robinson farm, eighth concession of Luther Township, Bruce County, with two complete heads, two mouths, and two tongues and two sets of teeth, is creating a sensation in the district. Over 200 have come to see the red calf, now two weeks old, to the tune of 25 cents a person. Mr. Robinson has been offered \$500 for the calf, but to date has retained it.

Send the Tribune to absent friends.

50 YEARS ON BROADWAY, NOW LIVES RETIRED AT BEAVERTON

From the gay white lights of Broadway to the quiet life of a Ontario town is quite a contrast, but William Pittaway, now retired and living in Beaverton, seems to enjoy it and even manages to fool around with show business in a minor way.

For almost 50 years Mr. Pittaway was closely connected with the New York stage manager for such famous producers as David Belasco and worked with such stars as Weber and Fields, Maude Adams, Lillian Russell, de Wolfe Hopper and Mrs. Fiske.

Married to a Beaverton girl, he retired a few years ago and has been living here since. This winter, when the Beaverton Choral Society was formed, Mr. Pittaway was persuaded to come out of retirement and since then his advice and assistance has been a great help in the staging of the choir concerts.

Mr. Pittaway isn't sure, but with the assistance of his record book he figures he has had a part in the staging of about 2,600 productions. Some, he says, were flops. Some were hits.

He remembers well the period he put in as stage manager for Weber and Fields Music Hall when the two comedians had an all-star cast which included the famous Lillian Russell and de Wolfe Hopper. "That," he says, "was a great show and a very happy one. Those were the days of Rectors and of 'Diamond Jim' Brady and their like won't come again."

Strike to End Strikes, Threat of Markham Reeve

"Some day we may be pushed a little too far and be forced to go on strike and when we do all the labor strikes that ever were conceived will be forgotten. Food prices will increase from 33 to 60 per cent," warned Reeve Charles Hooper, Markham Township, at the closing session of York County Council on Friday.

Reeve Hooper, chairman of the agriculture committee, made this stern prediction in stressing the vital necessity that the farmer receive a higher price for his products and thus obtain his fair share of the country's revenue.

He warned that the farmers have their organizations today but have hesitated to utilize their latent power to enforce their demands. "When that day comes, the very laborers, who are agitating for better working conditions and are disrupting our way of life, will be hard put to it to get a bite to eat," predicted Reeve Hooper, commenting that "farmers do not holler as loudly nor as consistently as labor."

The agriculture chairman was commenting on his committee report, which indicated that prices of butter had decreased 30c per pound; eggs 45c per dozen and milk 3c per quart, since 1920, while the price of grain binders had risen \$110, hay rakes \$21 and mowers \$34 since 1933.

"If we were allowed to receive a little higher price for our products so that we could hire competent help, the farmer could provide more employment than any other industry in Canada," declared Reeve Hooper.

"Year after year we hear this same complaint," declared Reeve George Mitchell, North York Township. "I cannot understand the farmers at all for they have more representation in the legislative chambers than any other group and yet they do nothing about it. Apparently the men they elect are not doing the job for which they were chosen," he concluded.

The committee reported considerable success in its campaign to eradicate barberry, which acts as a host for grain rust, which destroys oats and other crops. It was announced that campaign is now being waged in the same capacity.

PROPOSERS OF FRENCH TRY ANOTHER SCHEME TO PUSH LANGUAGE

Anyone could do their country a good service right now by sending a post card or letter to their member at Ottawa, Jack Smith for North York and Jack Leslie for East York, protesting a bill now before parliament known as Bill 55 which has just recently had its first reading in the House of Commons. The bill, if passed, would call for the labelling of any food or drug with instructions in both French and English.

It is pointed out that this bill if put into effect would necessitate the employment of French-speaking personnel in printing plants across the country and involve considerable additional expenditures on the part of printers to comply with the ruling. It will sharply increase the price of the article, and in some instances the labels will cost more than the contents of the package or bottle. This is just another attempt to force the French on all Canada. If you are interested drop a line to your member protesting the bill. His address is "House of Commons, Ottawa."

A. S. Farmer, Auctioneer

Additions to Rural Hydro Service

Your Commission desires to bring to the attention of Ontario farmers who have applied for Hydro service, a condition which is now seriously slowing up the building of rural extensions.

Essential materials and equipment are in extremely short supply, and the prospects of obtaining additional quantities in the immediate future are very meagre. Strikes in various basic industries and the extraordinary national demand are holding back the supply of all equipment needed.

While the Commission will exert every effort to obtain material and equipment for rural line construction, it can complete this year only a small part of the full program which it had planned. Consequently, many applications already approved will not, of necessity, be completed this year.

Your Commission will endeavour to serve all applicants in order of receipt of applications, giving preference to all farm and similarly essential applications over those for other types of service.

These facts are presented for your information, and with the expectation that they will enable you to bear more patiently with a situation beyond the control of your Commission.
