ALL WASHED UP

She had blood in her eye, and the dealer had black all over his when a woman stepped into a Kitchener store and asked where the washing machine was that she ordered four months ago. He couldn't give a satisfactory explanation, apparently, and that's how the trouble started.

PICKERING LANDMARK OF INDUSTRY, RAZED

One of the last carriage shops in Pickering Township and perhaps in the province of Ontario has been razed to the ground. It was on the property of Mr. J. A. Pugh, and was built somewhere over 60 years ago by the late Joseph Wilson who owned the property before Mr. Pugh purchased it. Mr. Hugh Mitchell bought the building for his chicken farm near Claremont.

The passing of this old shop recalls the beginning of the village in 1855. It was in that year that Donald McPhee, opened the first store and a grist mill was erected which surpassed all others in Pickering Township, and was said to have cost \$10,000. In 1866, a planing mill and a woollen mill were added to the village industries.

Whitevale was a busy place in those days. Besides the industries mentioned there was a stove and heading factory, a barrel factory operated by the Spink brothers, and the first carriage factory, to which the one just destroyed was successor, operated by the Pollard brothers. These later buildings were destroyed by fire in 1874.

THANK YOU

for waiting for delivery of your

NEW GENERAL MOTORS CAR

We are doing our best to see that you get your new car as quickly as possible

We want to thank every one of our customers — and every prospective customer as well — for the friendly patience with which you are awaiting your new General Motors car, whether it be a Chevrolet, Pontiac, Oldsmobile, Buick or Cadillac.

That patience will be more than rewarded when we hand you the keys to one of these great new General Motors cars, for here, in our judgment are automobiles ahead of their time — far and away the best in each of their respective classes.

We know how difficult it is to wait even a day for a car of General Motors exceptionally fine quality; but we believe you will understand that we and General Motors are as eager to deliver cars as purchasers are to obtain them. Unfortunately, the cars produced so far this year are far fewer than we and the factory had counted on. General Motors headquarters at Oshawa sums up the situation thus:

"Even though our rate of production normally exceeds that of any other manufacturer, we have been able to build, up to August 1, only a small percentage of the number of cars we built up to that date in 1941. Our own production, like that of the industry in general, is still far below normal, because of frequent shortages of essential materials and parts. Strike after strike at the plants of our suppliers has seriously impeded our progress toward full production, and the cumulative effect severely hampers both manufacturing and assembly."

While production is restricted, so — in proportion — are shipments of cars to us. As production increases, we are assured of getting our proportionate share of the total number of cars from the factory. But we want you to know that as quickly as these cars are received, we will speed deliveries to our customers.

We thank you, again, for your understanding and patience — confident that when your turn comes to enjoy the brilliant new standards achieved by the new General Motors cars, you will be thankful you waited.

Remember — Our CAR SERVICE is your best CAR-SAVER. Keep your present car in good condition until you get delivery of your new General Motors car, by bringing it to us for skilled service now and at regular intervals.
