Hundreds will testify to the good results obtained in Tribune classified advs.

Hello Homemakers! From washing dishes three times a day to the annual spring housecleaning, the everlasting cleaning goes on. It must have been observation of woman's endless attack on dirt that spurred manufacturers to make those perpetual motion cleaners. The vacuum cleaner is a real help during housecleaning. This machine cannot pick up sharp objects but does take the imbedded dirt out of any fabric thoroughly. When you demote the clothes closet and remove the accumulation above window frames and doorways the attachments will do the work easily for you.

You may make mental notes of the above but the engagement of a decorator should be done immediately by letter or phone in order that your schedule will be in accordance with his time table. (Hope he will be able to keep his date.) It is also time to select your wallpaper and paint. Many people are reverting to the new versatile papers for walls thus it is wise to make an early selection, and you can jot down the date to send the drapes and slipcovers to the cleaners so they will be back when your rooms are fresh.

With all this done you can clean out drawers and cupboards. This job takes time as you know and it takes courage for me to say this: be ruthless in disposing of the bits of "junk" that accumulate in any house.

Care and Operation of Vacuum Cleaners

To prove that a few minutes a day spent in caring for equipment will pay good dividends.

Operation
(1) Place the cleaner on the rug and with the handle in operating position adjust the nozzle so that there is a small space between it and the rug. When the motor is turned "ON" the rug will come to the nozzle; if an agitator type the rug should vibrate just in front of the cleaner when the motor is turned "ON."

Automatic agitating machines do not require this attention.

(2) Move the electric vacuum cleaner lengthwise of the rug, slowly. Each section should be gone over twice in order to remove imbedded dirt.

(3) Carry the cord in your free hand and avoid tangling it with furniture or cords.

(4) Turn off the motor if there is an interruption — furniture to be moved, door bell to be answered, etc.

(5) Always turn the switch "Off" before pulling out the plug at the outlet.

(6) Attachments should be used first.

Care of Vacuum Cleaner

(1) Before using the electric vacuum cleaner pick up tacks, pins and sharp objects, as well as live matches. These may cut or burn the belt of a motor-driven brush or they may puncture the dust bag.

(2) After each use empty the dust bag. Shake the dirt into a paper bag so that dust is not scattered again.

(3) Wind the cord loosely so that the fine wires inside are not damaged.

(4) Dust off the cleaner after each use.

(5) Clean off all attachments.

Special Care

(1) The dust bag should be turned inside out and brushed off, every 4 months.

(2) Remove all hairs, threads, etc. carefully, once a week.

(3) Oil the cleaner according to the manufacturer's directions. Usually 3 or 4 drops of graphite oil every 4 months is all that is necessary. Over lubrication is harmful, too.

(4) Worn or frayed cord, belt or brush of the agitator cover should be replaced.

Take a Tip

1. Try a small paintbrush for cleaning hard-to-get-at corners.

2. A paste of equal portions of salt and flour moistened with vinegar will lend luster to discolored brass or copper. Let the paste harden. Wash off with water.

3. Dust walls from the floor up. The fine threads of dust hang down. Best implement is a broom covered with flannel.

5. Housecleaning is no time to wear yourself out cleaning silver by hand. Drop silverware into a pan where each piece can touch an aluminum pie plate and cover silver with water. To each quart add 1 tsp. salt and 1 tbsp. baking soda. Bring the solution to a boil and tarnish should disappear in five or ten minutes.

6. You may be storing several tin iron utensils for the summer. If this be so, make them rust-proof by rubbing with unsalted fat.

7. Never dash ordinary salt into cast aluminum-pans. It causes a pitted utensil.

The Question Box

Mrs. E. N. asks: How to protect woollens from moths?

Answer: Laundering kills moth eggs and larvae. Woollens, not used regularly in summer, but not stored, should be aired frequently unless treated to resist damage. To store, wrap freshly laundered articles immediately in strong paper, seal tightly with gummed tape. Or store in a well-made cedar chest. Several new fabrics are now labelled moth-resistant.

Mr. T.J. says: We have found that a rug-cushion adds comfort and increases the life of rugs. May I suggest that housecleaning time is opportune for turning around the big rugs. We have also planned to paint the screen doors and window screens while the decorator is in the house.

Mrs. M. R. says: If you find rubber gloves difficult to wear while cleaning, it's a good idea to wear a pair of worn, cotton ones underneath.
