Mr. and Mrs. Feasby spent the weekend at Hickory Beach on Cameron Lake and report a true fish story. Early in the day, when out on the lake fishing, they noticed a good 'plug' floating on the water.

They picked it up, and later begin trolling. Within five minutes after Mrs. Feasby begin fishing with the newly found plug she landed a thirty inch Muskie. They continued trolling, and a few minutes later she either had another good strike, or the hook caught, breaking the line, and once again the lucky plug was lost in Sturgeon Lake. This is a true fish yarn as Mrs. Feasby brought the big fish home to prove her story.

Friday evening the boys loaded up in a truck and visited the Jr. Farmers at Uxbridge and beat that team 9 to 6 in a fast game. W. Todd playing in G. Todd place turned in a good game and in spite of no practice before hand did a good job behind the plate with A. Cooper pitching. This week Goodwood team will have a bushman's holiday owing to field day the team has postponed their game with Uxbridge. But on Monday night Udora will be here to try and gain a couple of points at the expense of the local boys who just aren't going to give them a point if possible.

Congratulations to our public school principal and to his entrance pupils, all passing with honors. Thus far our school trustees have been unable to fill the vacancy in the senior room.

FIVE KEY POINTS IN THE ACTION OF AN ALL-CROP HARVESTER

These vital points give the All-Crop Harvester its unusual ability to save over 100 grains, beans, sorghums and seeds.

Contact us immediately. There is a chance that you can obtain a new All-Crop Harvester, a used one expertly reconditioned, or arrange for a custom machine.

ALLIS-CHALMERS SALES AND SERVICE

1. Full-Width 5-foot Spiral Bar Cylinder — puts straw through without chopping—so it may be saved and handled like hay. Handles more than 100 different crops.
2. All-Rubber Shelling Contacts — rubber-faced cylinder bars handle green matter without shredding or squeezing out moisture. Cushion kernels against crackage.
3. Close-Cutting Header — Saves down crops. May be equipped with pickup attachment for wind-rowed crops, extension pickup guards, high-lift header or bundle-topping attachment for sorghums.
4. Air-Blast Separation — Proper speed of wide bar cylinder creates an air-blast which throws straw in a high, curving arc... allowing kernels to drop free.
5. Variable-Speed V-Belt Drives — Exact cylinder speed for any crop is controlled simply by turning a crank — or changing shims for different speed range.
