The Ontario Municipal Board has just approved of an expenditure of \$30,000 for an artificial ice plant to be installed in the town of Georgetown. It is amazing the number of improvements many Ontario towns and villages are installing these days. Artificial ice outside the very large cities was simply considered a financial impossibility ten years ago. Now such rinks are popping up in almost every district.

5-YEAR-OLD BOBCAYGEON BOY ELECTROCUTED IN BACK YARD

Bobcaygeon, August 23—Tragedy struck at the home of Mr. and Mrs. Jack Crowe, Bobcaygeon, between 6 and 7 p.m. Monday when their five-year-old son Robert Murray Crowe, was electrocuted when he came in contact with an electrically operated pump in his own backyard.

The boys father had been using the pumping equipment to pump out his basement and everything went well until the youngster left the house after eating his evening meal. He was found a few minutes later by his father with his foot touching the water pipe and to all appearance dead.

Medical assistance was summoned and artificial respiration begun

but to no avail. The youthful victim is survived by two brothers, Donald, 7, and Barrie, 2 and an infant sister, Nancy, four months.

Further details on the tragedy have just been received from Provincial Constable R. Taylor who was called to the scene of the accident by Constable William Warner of Bobcaygeon. Constable Taylor says the boy was found 15 minutes after leaving the supper table with his feet touching a water pipe used in the pumping operation. It is believed, although not established as a fact, that an old raincoat which had been thrown over the motor to keep it dry during a rainstorm had become soaked and caused a short circuit to occur which charged the piping which in turn electrocuted the boy as he trod on it.
