Mr. Harpur is employed with Buntin Reid & Co., Limited, and was naturally pleased with the village which he had heard so much about but had never seen before. Of course, visitors should see us in the summer time, when we do think the town is very attractive.

McCreight's Auction

The farm auction at James McCreight's on the 9th concession south of Stouffville proved very successful last week. High cow sold brought \$185, and her calf \$67 additional. The cows averaged \$150 and three heifers sold at \$150 each. The yearling calves demanded from \$45 to \$67.50.

In the implement line a Fordson tractor brought \$900 going to Mr. Little of Scarborough. The buckrake went for \$150 and the milking machine \$230. Oats realized 77c a bushel.

Mr. McCreight is giving up the farm because of ill health, and the esteemed couple are locating in Markham village for the present.

Mrs. Peter Bramwell, wife of Peter sr., received a letter from relatives in France last week, which told about high prices for the ordinary things of life in the food line. Butter sells for \$1.50 pound in Canadian money, and coal per 50 pound lots which is common or stand order is also \$1.50. In order to obtain sugar, coupons are still necessary in the land of the Frenchman.

Last week's report on the last meeting of the Garrett Evening Auxiliary stated that Miss Gladys Brooks gave the report of "Stewardship." This was an error, made in the office of this paper. The talk on "Stewardship" was given by Mrs. Herbert Lee, Miss Brooks tendered the vote of thanks unanimously passed by the meeting.

Flooded Cellars an Annual Event

Torrential rains all day Friday, plus the piles of snow that melted gave residents an anxious time keeping water out of their cellars since that day, especially was this the case in the west end of the town, where the land is flat and little natural drainage is afforded. It is probably safe to estimate that half the cellars had water in them, some flooding as high as cellar tables, putting out furnaces, and causing the attendant mess water creates in this way. Scores of appeals were made to town officials, who could do little but offer advice to those in trouble. The municipality is not responsible for cellar drainage, and the situation can only be improved, we believe, by the installation of a storm sewer in the north-west part of the village, emptying into the Main street sewer. Such an undertaking is partly municipal and partly private. Private citizens appeal for such a sewer under the local Improvement Act. If there are sufficient signers representing a certain assessment over the area to be drained the municipal council is duty bound to proceed with the work, the cost of which would largely be borne by the area serviced. The town in general would come in for certain expense such as where the sewer crosses roadways, and the general tax payer might be called on to bear certain portion of the cost because of the general benefit such a sewer would be to the roads and ditches in the section served. Every spring ratepayers shake their heads and suggest it would be a fine thing, and should be carried out. However, the scheme lacks leadership, and gets nowhere. When the spring freshets pass, so passes the enthusiasm.

Mrs. Scott will be remembered by many as Fanny Closson, she having lived at the west end of town where Jim Barry now lives. While down there she met a former Stouffvilleite Margaret Spofford, who is now Mrs. Baker. Margaret is the daughter of the late Fred Spofford of the former Spofford store here.

SHORT LIVED JOY

A couple of lads down the 9th concession of Markham very very close to the Lloyd Burrows farm, envisioned some fun with a new boat last week that proved short lived to say the least.

The boys invested in one of those small dinghys, or boats, originally designed by the Indians, but this was a rubber boat bought from War Assets stock. Placed into commission as the water rose higher and higher on the flats just as the lads envisioned when they made the purchase of the rubber boat, they set off down stream at a lively clip. Joy that knows no bounds!—but jip, "we hit a root," shouted one of the lads, and in the next instance the boat was deflated and the lads were in the cold stream, swimming for shore. It was all over just like that!
