How Is Your Cooling System?

Clean out Rust, Scale, Grease, Dirt and Sludge
the **BRADY WAY**

Clogged, sludge-coated radiators and blocks can cause untold damage to your motor and run into costly repairs bills.

We have just installed a new Brady Automatic Cooling System Cleaner. The Brady Way has revolutionized car cooling system cleaning, making other methods old fashioned and inefficient by comparison.

That's because the Brady Cleaner is quick, thorough and automatic. Nothing but the radiator cap is removed. And there's no danger of radiator blowouts.

Rust, scale, dirt and sludge are flushed from both the radiator and engine block.

Automobile manufacturers recommend that the cooling system be cleaned and flushed every 5000 miles or twice a year.

Since alcohol boils at lower temperatures, even a slightly clogged cooling system in winter can cause trouble—loss of anti-freeze, freeze-ups and burnups. The Brady Way guarantees that the cooling system is completely clean.

Money refunded if not completely satisfied.
