**HUGE TRANSFORMER TRAVELS C.N.R. AT A LIMITED SPEED**

One of the biggest and heaviest of its kind to be used in Canada, a 70-ton electrical transformer was delivered by Canadian National Railways recently to the Shawinigan Water and Power Company following its

arrival here from England. Because of the transformer's weight and size, the speed of the train hauling it was limited to 25 miles per hour. The electrical giant is 46 feet seven inches long; eight inches wide and 16 feet high.

**Attempt Made To Blast Safe at Mt. Albert Creamery**

An attempt was made to force the safe of the Mount Albert Creamery early Monday morning of last week, with what police believe was nitroglycerine. The noise of the blast and the barking of dogs are believed to have frightened the thieves away. William Hicks, living in an adjoining building, was awakened from his sleep by the blast and called Chief J. E. Jardine and Constable Charles Crone. Entry was made into the creamery by forcing a front window. Nothing was taken. The police are investigating.

The safe had been carried away once before and recovered and as a result Mr. E. Watt, a former owner of the creamery, had it built in securely and they were unable to remove it this time.

**Ribbon Winners For Mr. Truman**

Before speaking at a session of the National Veterans' convention in Des Moines, President Truman is shown receiving a tray containing 10 ears of Iowa corn judged as the blue ribbon winners in the recent Iowa state fair. Handless Harold Russell, 32, elected national commander, presented the corn.

A dollar is a dollar, or is it?

No man can be called lucky until after the last race.

A woman's club is urging a campaign of "wise spending." As if women need to be encouraged to any kind of spending.

A boxer in France listens to the radio before going into the ring. We can understand how it might sometimes put him into a fighting mood.

"As You Go Through the Years"

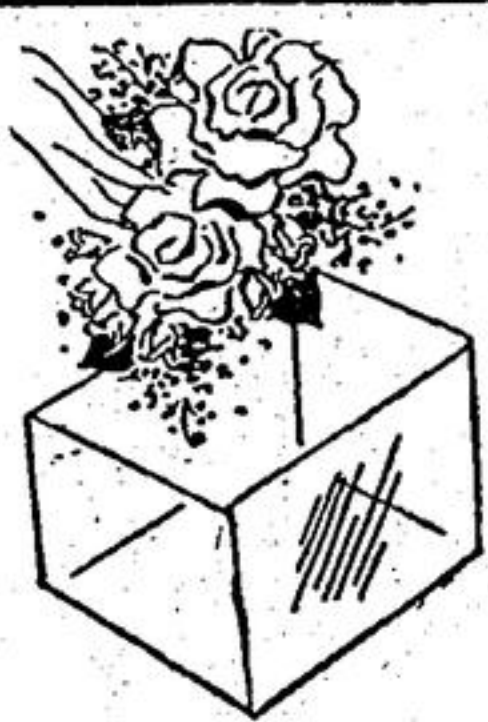

You came to our home; In the spring of the year A strange little boy, With never a fear, You have romped and you've played; And had lots of fun, With Bobby the dog; You have gone on the run.

Now you are going to leave us; But, be careful my dear, For bad boys you will meet; As you go through the years, Don't let them persuade you, To do what is wrong, Just say no it doesn't pay, This will help you to be strong, So that later in life When temptations come your way, It will then be so easy For you to say no it doesn't pay.

I will think of you often; And no doubt you will me, Sometime you may come back; Your friends here to see, But, wherever you wander; With whom you may be, You can always remember, The years spent with me.

And do not forget John Before you get into bed That God will watch o'er you; If your prayers you have said, Then when morning comes, And you start a new day, God still will be with you, At work or at play. Written for John on leaving our home after spending two and one half years with us. Mrs. Wm. Beach.

Inhabitants of New Zealand have the longest life expectancy.

CATTLE SHIPPERS SEEN BENEFITTING FROM NEW RATE

Ontario farmers shipping cattle to the United States stand to benefit as a result of dollar devaluation, providing present prices are maintained, W. P. Watson, Ontario livestock commissioner, said last night.

More than 100,000 head of dairy cattle went to the United States last year and the flow of beef cattle has been heavy since the embargo was lifted last August.

Exports should be stimulated because the farmers will be paid in U.S. currency which will bring a premium in this country, Mr. Watson added.

Dollar devaluation was greeted with a "wait and see" attitude by officials of the farm implement industry.

Penguins are birds, but they never fly.

**ALUMINUM**

**A** A thirteenth of the earth's crust is aluminum. It is found in mountains and gems, in vegetables and clay, in meat and water — practically everywhere.

**L** Long ago the Romans knew it as a salt. They called it "alumen" and used it as a medicine or for dyeing cloth.

**U** Until the middle 1800's, the metal aluminum was rarer and more costly than gold. Napoleon III had his own personal tableware made of it.

**M** Modern science found a way to make it cheaper. That is why, today, everybody can buy useful and lasting articles made of aluminum.

**I** In Canada we have none of the high-grade aluminum ore called "bauxite". Canadians bring it in by shipload from British Guiana — a voyage of 3000 miles.

**N** Northeastern Canada has the world's largest aluminum smelter. Alcan built it there, at Arvida. This site was chosen because it is close to both a port for ocean ships bringing bauxite and an abundant source of hydro-electric power.

**U** Until Alcan harnessed this water power, it ran to waste. Smelting aluminum needs vast supplies of power. The electricity required to produce one ton of aluminum would light your house for fifteen years.

**M** More than 15,000 people operate this Canadian industry. They earn more than thirty-five million dollars a year. These earnings flow across Canada.

**Alcan** (Aluminum Company of Canada, Ltd.) makes aluminum ingots. More than 1000 independent manufacturers across Canada shape aluminum into light, strong, non-rusting articles for your use. The variety grows daily.

In addition to supplying these firms, Alcan sells about 85% of its ingots to other countries. This aluminum is now Canada's sixth largest export, a source of much needed money from abroad.

Because Alcan does market so much abroad, it is able to make aluminum in such large quantities that, in ingot form, it can be purchased more cheaply in Canada than anywhere else in the world.
