Big Drop In Pickering Assessment Appeals

About twenty-five appeals against the assessment of the Township of Pickering were slated to be heard at the annual Court of Revision being held this Wednesday at the municipal building in Brougham. This is less than half the complaints against the assessment roll registered last year following the hoist in assessments throughout a great area of the township. Reeve W. H. Westney is presiding today at the hearing.

At the regular meeting of the township council held last week, H. J. Miller of the 7th con. received a total of \$205. for four sheep and two lambs killed, two sheep and one lamb injured. Harold Phillips of the 5th con. received \$15. for sheep damaged by dogs and James Murdock, 4th con. was paid \$8.00 for a calf killed.

The township is in receipt of a cheque for \$21,736.19, their fifty per cent road subsidy from the Dept. of Highways for the first seven months of this year. Road assessments passed for payment in September amounted to \$2,841.09. The matter of increased salary for the Road Supt. Roy Ward was discussed. Mr. Ward has handled the building of several new bridges in the township which it is believed would have cost the municipality considerably more had they been contracted for by outside labour.

Messrs. Duncan, Conner, Reynolds and Gray asked council for permission to close the road between lots 24-25 in the 6th con., but no action was taken.

Thos. Stanbury of Claremont also asked to have Mary St., Claremont closed. Part of Mr. Stanbury's buildings are on the roadway. Council agreed to advertise the road allowance for a sale in the customary way to dispose of it.

Hospitalization and relief accounts for the month passed for payment amounted to \$1134.32.

Hearing on Ajax Cancelled on Tuesday

Central Mortgage & Housing Corporation Withdraws Application for Improvement Area — Farmers Had Protested Vigorously

The hearing by the Ontario Municipal Board scheduled for Tuesday of this week at Brougham, was cancelled last weekend when Central Mortgage and Housing Corporation withdrew their application for an improvement area surrounding Ajax.

Farmers in the area marked for inclusion in the improvement block have objected strenuously to the move, and whether this objection influenced the Mortgage Corp. in their withdrawal is not known.

Now that the application has been withdrawn the Village of Ajax still has two courses open to it. It can remain under the control of Central Mortgage and Housing or it can come under the control of the Township of Pickering. During the hearings of the application for an improvement area the Township went on record as being interested in ceding only that portion of the township which includes the village proper. It did not wish to lose control of the farm lands surrounding it.

Reeve W. H. Westney of Pickering Township, Warden of Ontario County told The Tribune that it had been suggested that the matter be given a six-month hoist in order to clear the air. He said the Township had no objection to this. It was his understanding that the agreements for Ajax with Pickering Township and the County of Ontario would be continued.

The Village of Ajax which has a population of 2,600 and a potential assessment of well over \$3,000,000 comprises an area of over 3,000 acres. It came into being early in World War II when Defense Industries Limited set up a large shell-filling plant. To do this, a large number of farms in the area

visitors come out to seek a form of fun that city people would not tolerate.

A few misguided youths can soon give a neighborhood a bad name. Our school trustees are to be commended for their prompt action in dealing with some local cases.

The Club met at the home of Ben and Mrs. Bryant on Wednesday evening last and heard an address on Silver Foxes from Mr. Agar of Brooklin.

Jack McCarthy, brother-in-law of Gordon West, has purchased the property north of Mr. Talons, from Bing Yip and will take possession in the spring.

The Royal Winter Fair will take many of our people to Toronto next week.

extending almost from Highway No. 2 to the shore of Lake Ontario was taken over.

On the site was erected a large number of buildings associated with the wartime operations including dormitories, dining halls, a recreation hall, lodge, a school, a hospital and fire hall. A pumping station and sanitary sewer system together with a sewage disposal plant was erected together with a modern pumping station and water mains to serve to 900 homes in the housing area. Three hundred of these homes are permanent. A shopping centre has grown up along the plant road.

Since the cessation of hostilities, the project was taken over by Central Mortgage and Housing Corporation, a Crown Company, which has striven to develop the area as a model industrial community. A number of new industries have located in the area. Plans are well on the way for the development of a modern, well designed community.

Following the war part of the grounds and buildings were leased to the University of Toronto to provide accommodation for the large number of war veterans which sought degrees in the university's Faculty of Applied Science. At the end of May of this year, the university's lease expired and the last of the student body and faculty returned to Toronto.

Before BRADY CLEANING

THIS IS THE WAY the cooling passages in an engine look after months of driving—filled with rust, scale and oily sludge. The radiator is in the same condition. Heat cannot easily escape. Some passages may be plugged tight. Overheating means engine trouble—rapid, undue wear—costly repairs.

After BRADY CLEANING

THIS IS THE WAY the engine looks AFTER cleaning the Brady Way. Every passage is open and walls are cleaned of lime-scale, rust and sludge. Heat escapes freely around cylinder walls, valves and through the radiator. The cooling system can operate without heating—at any speed on any hill!

NEGLECT OF THE COOLING SYSTEM can lead to serious consequences.
