MOUNT ALBERT MAN

IS TOP BUTTER JUDGE

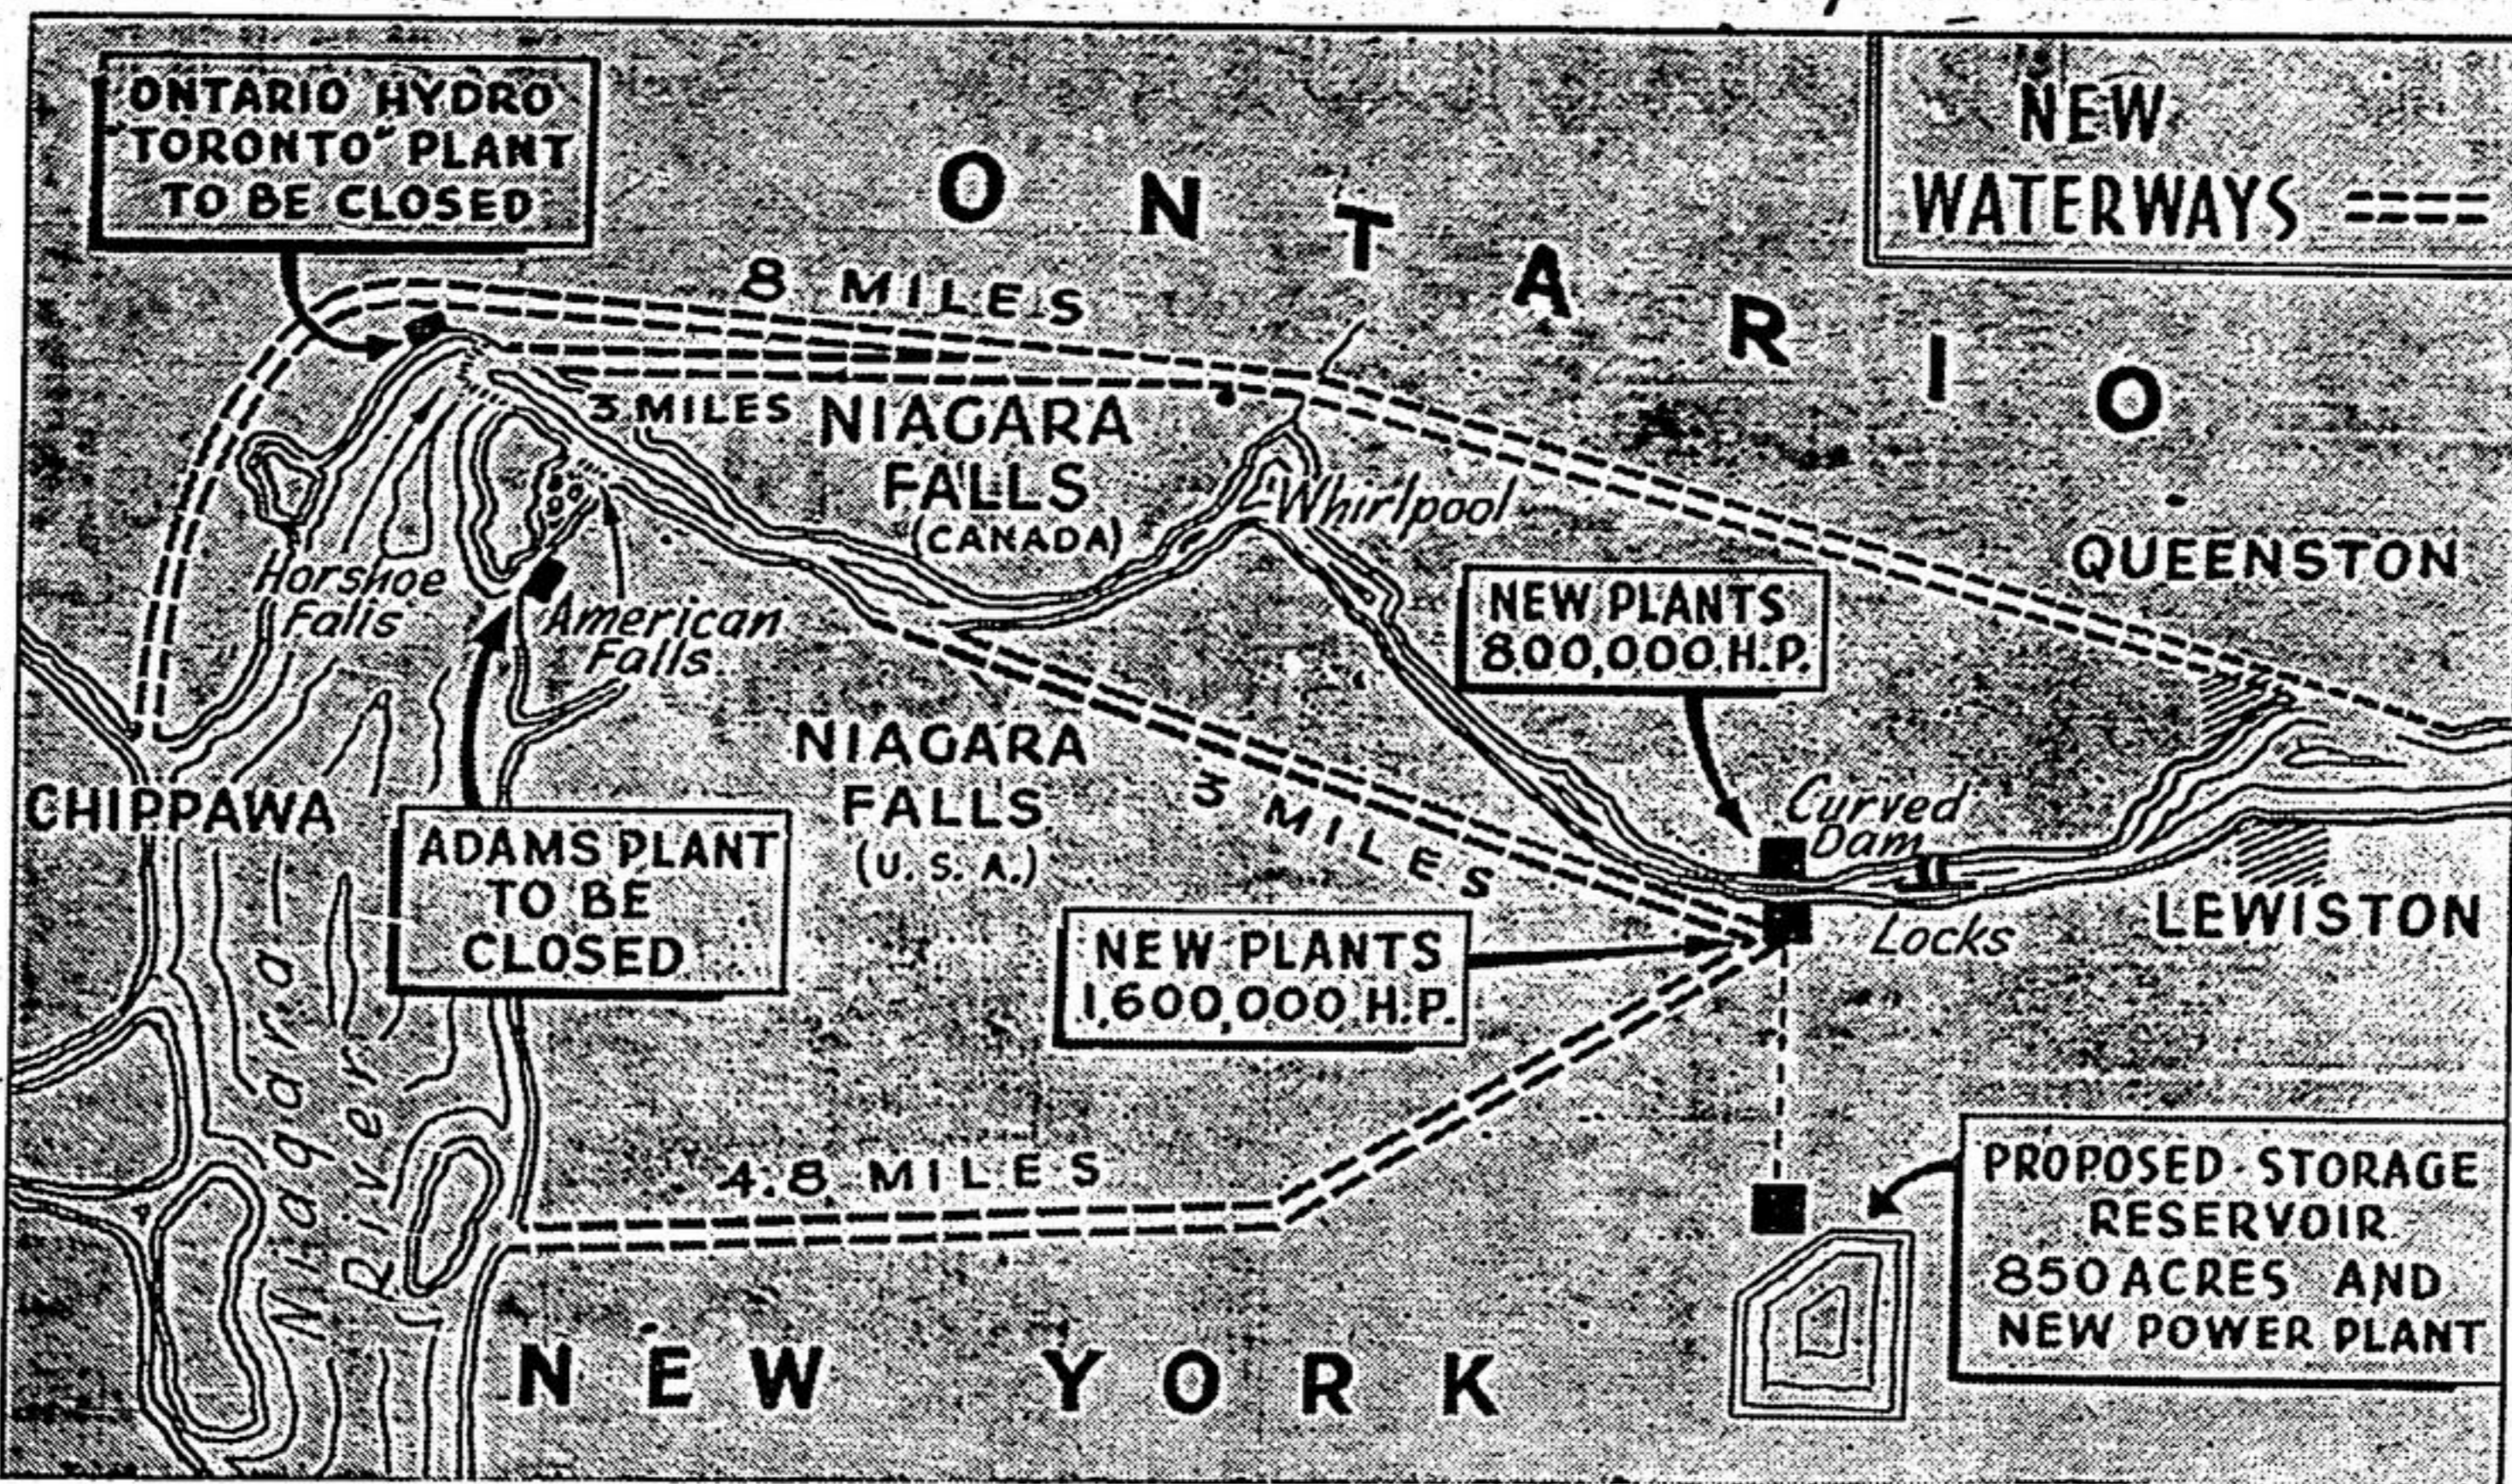

Milton Gibney, Mount Albert Creamery, Mount Albert, Ontario, is the province's champion butter judge. Announcements of winners follows the annual meeting of the Ontario Creamery Association held last week at the Royal York Hotel, Toronto. One hundred contestants from all parts of the province participated and J. L. Baker, Assistant Director, Dairy Branch, Ontario Department of Agriculture, was chairman.

Results of judging follows: High individual in butter judging and winner of Canadian Vegetable Parchment Trophy — Ural Mayberry, Guelph Creamery, Guelph.

High individual in cream judging and winner of Canadian Vegetable Parchment Trophy — Milton Gibney, Mount Albert Creamery, Mount Albert.

High individual aggregate standing in both butter and cream judging and winner of John H. Scott Trophy — Milton Gibney, Mount Albert Creamery.

TO MAKE NIAGARA WORLD'S LARGEST POWER PLANT

Canada-U.S. talks opening in Washington are expected to lead additional harnessing of Niagara River power. Ontario asks diversion of additional water from the Horseshoe Falls. Ontario-New York plans propose a concentration of

power plants which ultimately will dwarf any existing or proposing power projects in the world. Ontario's current output of 800,000 horsepower would be at least doubled by two new Queenston plants, each possibly as big as the

present Queenston plant. Plans call for ultimate capacity on both sides of river of 4,160,000 horsepower, compared with 1,365,000 horsepower produced by the world's largest project, Grand Coulee. Cost of new

construction on New York side of river is officially estimated at \$350,000,000, while Ontario development, it is believed, would boost aggregate figure to well over \$500,000,000. Map shows major construction involved on both sides of river.

NEW WINDSHIELD GLASS CUTS HEADLIGHT GLARE

A glass-maker has come up with a new automobile windshield glass that will take some of the sting out of the glaring headlights of oncoming cars.

Since "sealed beam" headlights were developed some years back, the average car's main lights have been so dazzling they are nearly always a great annoyance to motorists and often a serious danger on the roads.

To meet this problem, at least in part, the Libbey-Owens-Ford Glass Co. has produced a new glare-reducing safety plate glass for windshields. It has a slight bluish-green tint. Iron added to the raw material mixture largely does the trick.

The new glass has been road-tested and has been found to cut glare materially, whether from headlights or the sun. No claim is made, however, that the product will do too much toward protecting a driver's eyes from the direct rays of a rising or setting sun.

Drivers who have used the glass say they don't particularly care any more whether oncoming cars at night dim their headlights or not. They say the tinted windshield softens the glare considerably.

Regular windshield glass allows 88 per cent of available light to pass through, Libbey's new product lowers this figure to 82 per cent. That is just four per cent above the minimum demanded by state laws for safety's sake.

When bells were still uncommon in New England the early settlers used drums to summon worshippers to service.

For Christmas Morning and For Days to Come

Give . . .

- Sheer Flattering Nylon Hosiery
- Serviceable, Yet Dressy Crepe Hosiery
