Blackstrap Has Merit

Feeders will be interested to learn that they can feed 3 to 5 lbs. of Blackstrap (Cane Molasses) per cow or steer per day on roughage. It can best be applied to roughage by mixing it with hot water and sprinkling it over the hay or straw, etc. with a garden sprinkling, can at least one feed ahead. As WIB Pure Cane Molasses has a feeding value of almost the equivalent of corn, the grain portion of the ration can be reduced in proportion to the amount of molasses being fed. A good rule to follow is that of 10 lbs. of molasses will replace 9 lbs. of corn. As the molasses increases the palatability of rations, its use will actually increase the efficiency of the complete ration. This winter a great deal of poor quality roughage will be utilized so molasses will definitely have a place in almost any livestock feeding program.

MOLASSES AVAILABLE IN STEEL DRUMS FOR IMMEDIATE DELIVERY
