

NOTICE

The Council of the County of York on November 18th, 1949, passed a By-law under the provisions of the Trees Conservation Act, 1946, Statutes of Ontario, 1946, Chapter 102, Section 1. This By-law Restricts and Regulates the Cutting of Trees in the County of York. Further information with respect to the provisions of the By-law may be secured from the County Clerk, County of York, 67 Adelaide Street, East, Toronto.

Fred Baggs Heads Milk Producers

At the first meeting of the 1950 Board of Directors the following officers were elected: president, Fred J. Baggs; 1st vice president, George Smith; 2nd vice president, Bert Weatherill; secretary, H. D. McCague; treasurer, Frank Dimma; representative on the County Federation of Agriculture, Dalton Rummy; auditors, Bert Weatherill and Fraser Gee; press reporter, Fraser Gee. E. A. Buchanan was re-elected to represent this district as director on the Toronto Board at the annual meeting.

Reports from delegates to the Toronto annual meeting were then heard and the resolutions passed there proved good matter for discussion.

One particularly vexatious question is the matter of no Sunday pick-up of milk at the farm and particularly the high-handed manner in which the distributors introduced this measure without consulting our producers' board. They give as their reason that with the milk drivers demanding a five-day-week they have no other alternative without raising the price of milk and they are unwilling to do that. That this places an

added burden and expense on the producer who must work a good deal longer than a 40 hour week and face the expense of new and larger cooling equipment, or that it places the quality of the milk in jeopardy does not seem to matter to them.

Another matter that is causing the group much concern is that of getting a marketing agency established. Two annual meetings in Toronto have voted in favour of this and we wonder why so little headway has been made. A committee was appointed to look into this and report at the next meeting.

Some good resolutions have also come to hand from the annual meeting of the Ontario Whole Milk Producers' League. Here are a few to think over.

(1) Whereas the future of the dairy industry may be in jeopardy through the loss of export markets, and whereas the loss of export markets at the present time would lower farm prices which would in turn destroy the farmer's buying power and eventually cripple industry and bring about conditions like the thirties, and whereas we have great faith in the possible future of Canada.

Therefore be it resolved that we demand the Federal Minister of Agriculture, the Rt. Hon. James Gardiner, to fulfil his promise made at the Palace Pier meeting

in Toronto, "that if the farmer accepted reasonable prices during the war years, his markets would be protected afterward."

(2) Whereas it is customary to establish wages of industrial workers on a five day week.

Therefore be it resolved that we request the economists of the Provincial Department of Agriculture to study the effect of a 48-hour week on farms at 50 cents an hour as a minimum wage in relationship to the cost of production of milk and report to the Ontario Whole Milk Producers' League at as early a date as possible.

(3) Whereas there is considerable dissatisfaction with the accuracy of the present method of testing, sampling and weighing of milk received by the distributors.

And whereas there is usually a great variation between the distributors tests and R.O.P. tests, which in many cases are below herd average.

And whereas this discrepancy may be due to improper sampling and mixing.

And whereas most other agricultural products, such as fruits, vegetables, hogs, etc., are purchased on a grade established by government inspectors.

Therefore be it resolved that we request the Ontario Department of Agriculture, through the Minister of Agriculture to appoint government testers to do all testing, weighing and taking of samples of all milk purchased by the milk distributors in Ontario and that payment of producers be based on these findings, and further that necessary legislation be implemented to make this possible in any milk shed where the majority of its producers request some.

Plans are under way for our annual banquet again this spring so be watching for further notice.

WILL SELL CAR IF NED SPARKS DOESN'T PAY \$300

If Ned Sparks, dead-pan Hollywood movie comedian, wants back his 1934 custom-built, three-ton sedan, he had better speak up before Jan. 24.

That's the day a Bay St. garage in Toronto has set for the car's sale at public auction for alleged non-payment of \$300 in storage fees over a period of months.

Sparks, born in St. Thomas stored the car in Toronto in 1940 and returned to California after performing on a radio show for the Ontario government.

For years, payment of storage fees turned up regularly. But for months now the garage claims they have been unable to locate him, or have they heard from him.

Weak, Tired, Nervous, Pepless Men, Women

Get New Vim, Vigor, Vitality
Say goodbye to these weak, always tired feelings, depression and nervousness due to weak, thin blood. Get up feeling fresh, be peppy all day, have plenty of vitality left over by evening. Take Oxy-Markham. Contains iron, vitamin B₁, calcium, phosphorus for blood building, body strengthening, stimulation, invigorates system; improves appetite, digestive powers. Costs little. New "get acquainted" size only 50c. Try Oxy-Markham Tablets for new, normal pep, vim, vigor, this very day. At all drugists.

Mennonites Can More Beef To Aid Europe

A provincial-wide beef and chicken canning project for European relief has just been opened by the Kitchener headquarters of the Mennonite Central Committee, it was revealed on Saturday by C. J. Rempel, director.

Practically all Mennonite churches in the province including the Markham Churches are expected to contribute. Canning will take place at the canning plant of S. S. Martin, Florida.

Two or more carloads of the tinned meat will be donated for distribution in Europe.

Last year the meat shipment in a similar drive totalled 30 tons.

Gifts of beef in whole carcasses, halves or quarters, are brought to the Florida plant where the meat is done up in 28-ounce tins. Packing into cartons of 24 tins each takes place at the Kitchener ware house.

Some donations are in cash which is used for the purchase of either beef or chicken. Flow of donations is regulated through arrangements of Cornelius Barg, packing supervisor at the Kitchener warehouse. The Florida plant canners would be swamped if everything landed in at once.

The meat cargo is shipped to Bremen, Germany, the main distribution point of the Mennonite relief for the continent. From there it is railed to various projects in different countries of Europe.

The beef project is just one phase in a steady stream of relief shipments continuing from Canadian Mennonites to Europe. Mr. Rempel recently completed shipment of 28 tons of mixed food-stuffs, including large quantities of apple butter.

Another campaign now in progress is collection of cleaned and pressed sugar bags for European Mennonites recently settled in Paraguay. The bags will be turned into work clothing. The bag material appears to stand up better than any material under heat and perspiration to be contended with in Paraguay.

FIND MISSING DOG SAFE IN CRATE

Lassie came home yesterday, and Canadian National Railways express men were relieved.

The large Scottish sheep dog broke away after being taken out of her crate at Ogilvia for exercise while en route from Geraldton to Midland. She made off down the tracks with express employees in hot pursuit. When last seen she was three miles north of Orillia.

Later, employees decided to send the empty crate on to Midland. The workmen lifting it thought it was unusually heavy. Looking inside, they found the dog sleeping curled up inside her temporary home.

Building Restriction By-Law Tested in Court

A test case of considerable importance to the township was settled when William D. Baker of Richvale and Douglas Fear of Jacques Avenue were found guilty in York County police court of an infraction of Vaughan Township's by-law governing building restrictions reports the Richmond Hill Liberal. Baker was fined \$10 and costs while sentence was suspended in Fear's case.

Charges were laid by H. C. H. Miller, township building inspector, on the instructions of the township council.

Giving evidence in the Baker case, Mr. Miller stated that he had taken out a permit for a garage and dwelling. The garage was built and Baker started to occupy it as a residence in September, 1948. In November of the same year he was given official notice to vacate, as the building did not comply with regulations laid down by the township for dwelling purposes. He was given until October 31st, 1949, a year later, to make arrangements.

On November 14, 1949, said Mr. Miller, Baker was sent a letter asking the time at which he intended to vacate, but made no written reply. Finally the summons was issued.

In the case of Fear, the building inspector's evidence was that he had been given a permit for a garage only in July, 1948. This was occupied as a dwelling and, as in the Baker case, notification to cease using it for that purpose was given, with a year being allowed to vacate. Fear, he stated, had replied saying that it was his intention to build a residence in 1950 and that he would take out the necessary permit at that time. Subsequently, however, he started to build an extension to the garage, and without a permit, consequently a summons was issued in this case also.

Vaughan Township Council, officers of the municipality say,
