NOTICE : Don't forget to meet your friends for fun
and fellowship at Fellowship Centre, Lemonville,
Saturday at 8 p.m. Silver Collection.

N. Rowan, Director.

Newmarket Approves School Wing But Voices Dissatisfaction

(The Newmarket Era)

A majority of the municipal councils in the Newmarket-Sutton high school district have given their approval to the building of additions to Newmarket and Sutton high schools. Both Newmarket and Whitchurch township passed resolutions favoring the school wings. Although Newmarket gave its tentative resolution favoring a debenture for a high school wing here, there were expressions of disapproval toward provincial legislation which, members of council claim, limits a municipal council's freedom of action.

According to the town solicitor, council could either vote in favor or against building high school wings but legally could not hold a vote by the property owners of the town.

K. M. R. Stiver, the solicitor, said that according to legislation, if a majority of the municipalities vote in favor of the school additions, the project can be carried out. A majority of the five and a half municipalities, Newmarket, North Gwillimbury, East Gwillimbury and Whitchurch have already approved. With only half of Whitchurch in the school district, the total is three and a half which have approved. Only Sutton and Georgina remain to indicate their attitude toward the building program.

"The only thing wrong with this," said Mayor Vale, "is that the Newmarket property owners said by a vote ten years ago that they did not want to finance a school wing. Now it is going through whether the taxpayer wants it or not."

"The existing provincial legislation does not give us the opportunity of asking the man who will pay for it, whether he wants it or not."

Both Deputy-Reeve J. L. Spillette and Councillor Rudy Renzius pointed out that there was no vote taken on the public school debenture nor the artificial ice debenture.

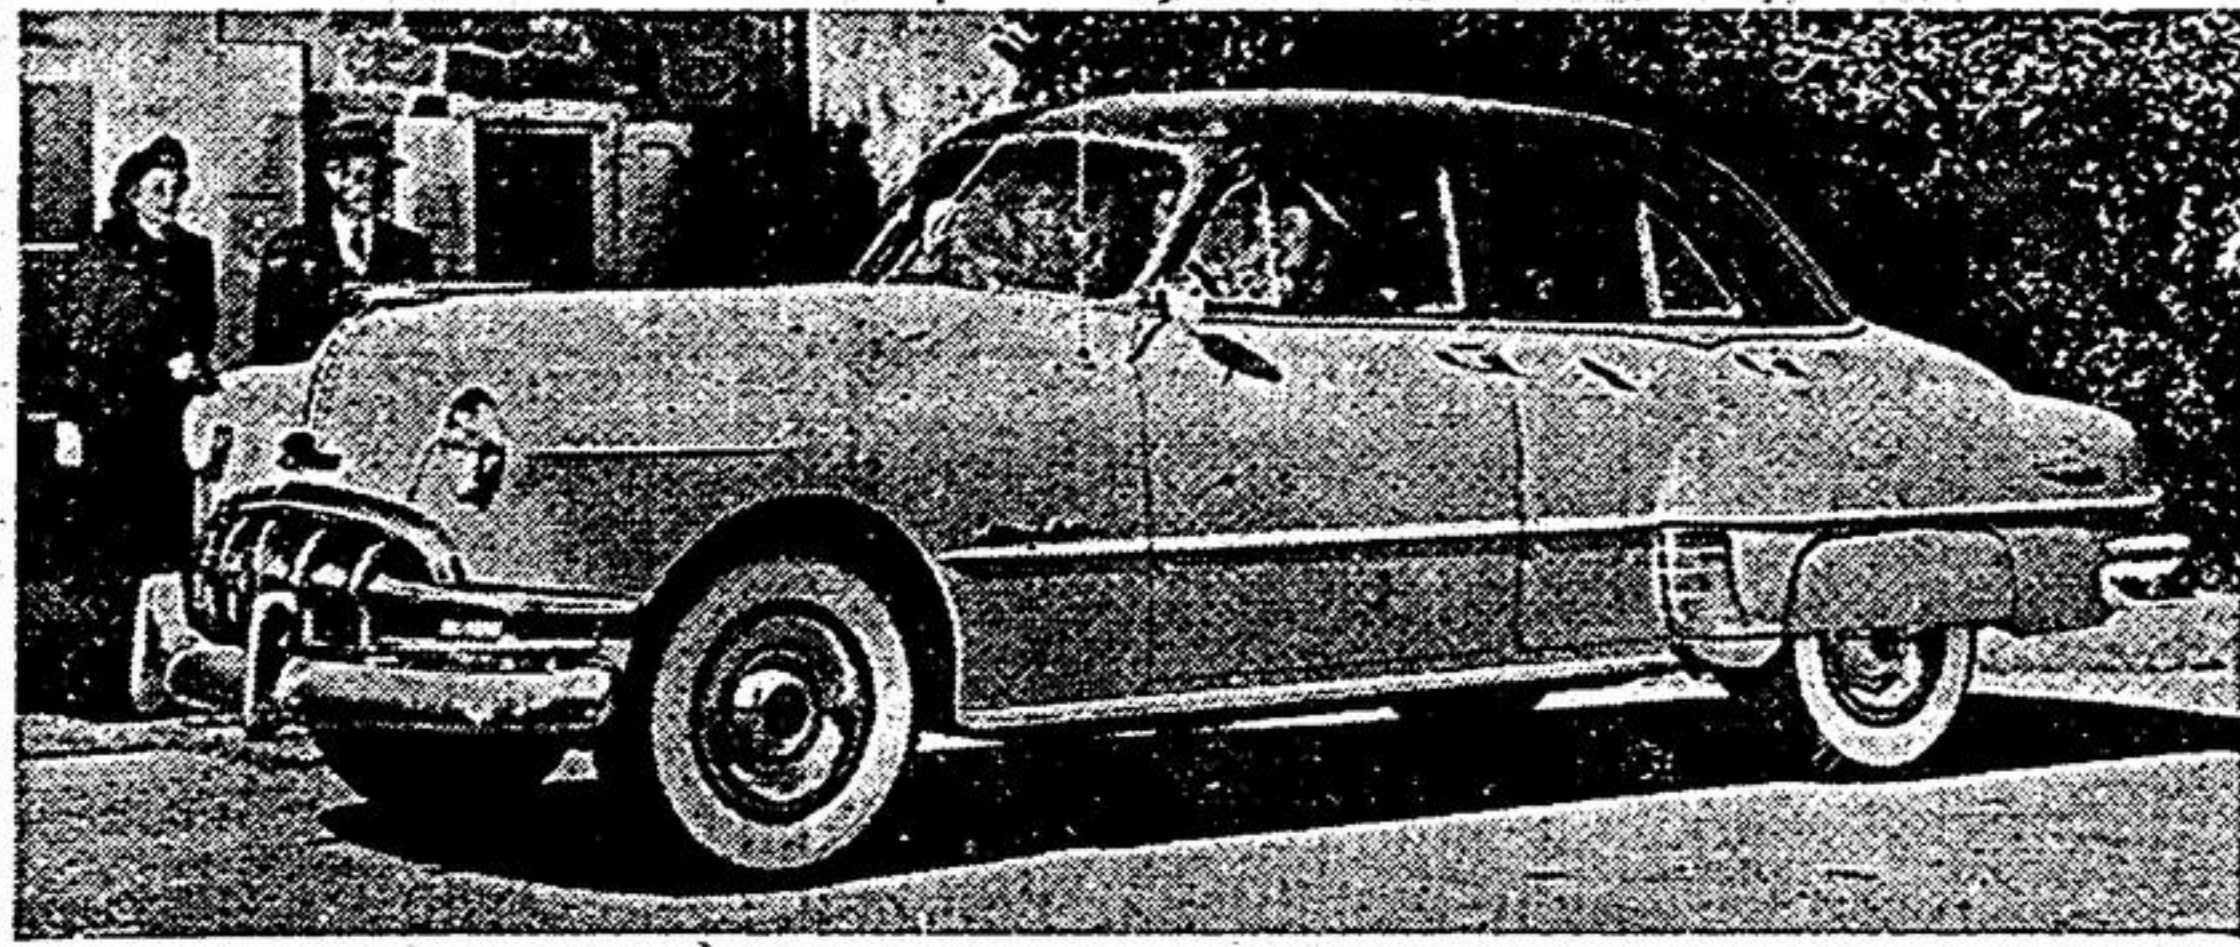

"Well, it's not right," said the mayor.

"But we can't take over and do the work that the department of education does," declared J. O. Dales.

"But it's getting more and more into situations like this where we are being told what to do and are left no choice. It even has come to the point where we must get permission from the government to raise our own salaries."

Council's vote was unanimously in favor of the school wings.

Acetate rayon is a natural product. Its basic source material is wood from Canadian forests.

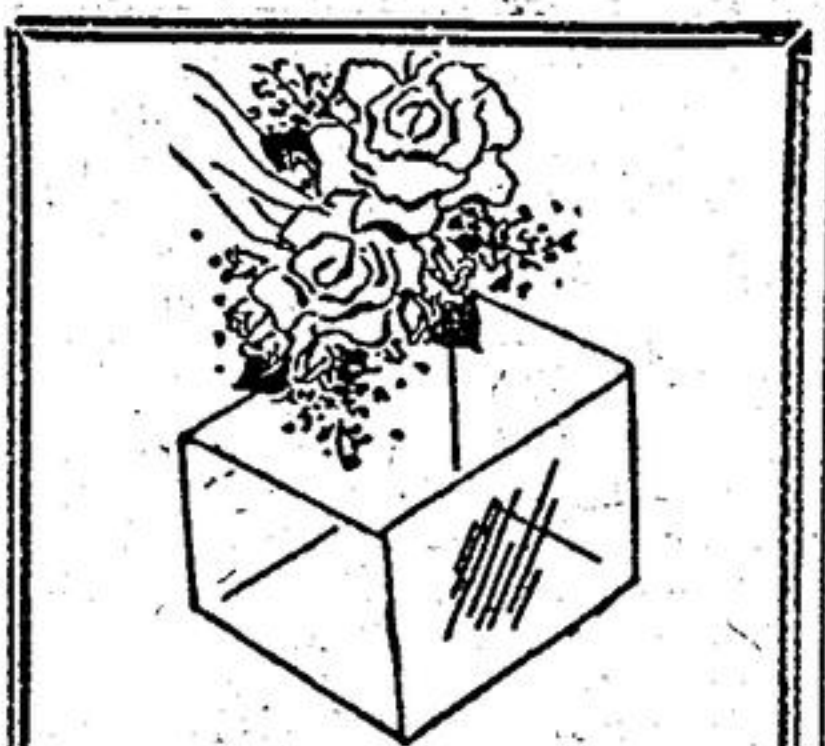

THE NEW 1950 PONTIAC offers more than a score of appearance and mechanical changes and is available in 21 models beginning in the lowest price range, according to a General Motors announcement. New massiveness in frontal design is achieved with main grille bars reaching out and around the fenders. The new Pontiac offers a choice of six and eight cylinder engines, the latter stepped up to 108 horsepower. Other mechanical features include a new and larger radiator core for the six cylinder engine and rubber rear spring bushings to eliminate road shock and power transmission noises. Hydraulic drive is again available as an option at extra cost on certain Pontiac models. Shown here is the Chieftain four-door Sedan.

U.S. POTATO PRODUCTION

United States potato acreage in 1949 was the smallest in 70 years, but the average yield of 211 bushels to the acre came close to the record yield of 216 bushels in 1948. Better management practices including such items as improved seed of higher yielding varieties, better tillage and the adoption of more effective methods for controlling insects and diseases, are the reasons given for the increased yields.

Birds use mud as cement in building nests.

Milt. Smith, Prop.

Archduke Charles of Hapsburg, fifth son of the late Emperor Charles of Austria, is shown with his mother, Empress of Austria, as they arrived for his wedding, with all the trappings of old world

pageantry apparent in the background. He was wed in the tiny village of Beloeil to Belgium's Princess Volandé de Ligne of the historic Bourbon line. The couple will make their home in New York.

Women's Editor Dr. Ruth Nanda Ansheh says the trouble with the world today is women don't want to be women. They'd rather be men.

On the St. Lawrence Gulf Island of Anticosti deer are so numerous they stroll into Port Muniere; must be thinned out by official hunts from time to time.

Death Claims Uxbridge Man in Sleep on Couch

It was with deep regret the many friends of Mr. Edward Prentice learned on Sunday morning last that he had passed away in his sleep at his home on Main street. Sunday morning Mrs. Ed. Steward, a neighbor who had been keeping a neighborly eye on him for some time past, went over to the house but got no answer to her knock and then got Rev. Mr. Fleischer, another neighbor. They broke into the house and found Mr. Prentice lying on the couch,

quite evidently having passed away quietly in his sleep.

Edward Prentice who was in his 78th year was born in Uxbridge in 1872, a son of the late Robert Prentice and Maria Golden and lived in Uxbridge all his life, where he was well known and highly respected.

He possessed a quiet, friendly disposition and was a most kindly and friendly neighbor and he also possessed a very artistic ability in making hooked rugs, a great hobby for him in his later years. Many very fine ones having just lately been completed.

NOTICE TO ONTARIO MOTORISTS

Re Unsatisfied Judgment Fund Fee

Under an amendment to the Highway Traffic Act enacted in 1947, provision was made for the creation of an Unsatisfied Judgment Fund out of which will be paid, in the manner prescribed, judgments for personal injuries and property damage sustained by reason of the operation of motor vehicles, which cannot be collected in the ordinary manner from the judgment debtors.

The method prescribed for creating the Fund is the collection of a special fee, when required, from each person to whom is issued either an operator's or a chauffeur's licence.

While this legislation has been in effect since the 1st of July, 1947, the Unsatisfied Judgment Fund Fee has been collected only since January 1st, 1949.

Total fees collected for the Fund and repayments to the Fund from January 1st to December 31st, 1949, amounted to.....\$638,430.37

Judgments paid out of the Fund from July 1st, 1947, to December 31st, 1949, amounted to.....\$630,644.03

As there is not now sufficient in the Fund to pay judgments for a period of a year, an Unsatisfied Judgment Fund Fee of 50c will be collected from each person to whom is issued a 1950 operator's or chauffeur's licence.

DON'T "PANIC" OUT OF POULTRY... FOR EARLY Chicks Will PAY

Panic selling of laying birds has reached such proportions that there's every likelihood that laying pullets will be mighty profitable property next summer. And so far very few chicks have been started — the pullet chicks that should be laying next Summer, the cockerels that should be meeting the tourist meat demand.

There's never any sizable egg surplus during the Summer and early Fall... always a shortage of big eggs. This year the supply situation is likely to be the same as in previous years — only more so! Everything points to good prices and a wide spread for size through Summer and early Fall... June to October. And the same shortage is likely to show up in the broiler and light roaster market.

There's opportunity here for the poultry raiser who starts good chicks right away... starts them "flying" on Startena Checker-Etts... grows them fast and fully on a good Purina growing ration... gets big eggs to sell on that top market... well-finished meat birds for the tourist season.

Start good chicks early. Start them fast. Grow them big and solid. There's the formula for poultry profit in 1950! And here's the feed to start them fast, with high livability and high vitality — Purina Chick Startena.

Best Feed Investment You'll Ever Make!

Both cows and sows need special feed while they're "dry" — to help them build both their own bodies and the bodies of their young. This is probably the best feed investment you will ever make — if you pick the right feed. Ask us about the Purina Programme for these two classes of stock.

Would you like to put more milk in the cans, less in the calves... make money, save money, save time and work, and still raise topnotch calves? Here's how you can do it. Start your calves on Calf Startena... no milk after the first month, less work, top results.

PURINA CALF STARTENA

To balance your grain —
PURINA HOG CHOW
If you're low on grain —
