Previously many of these rate-payers had been refused hydro installations until their dwellings conformed with the township building requirements.

The engineer explained that these short-term contracts with a minimum of \$30 charged could only be renewed if council were given a reasonable reason for doing so, otherwise the current would be cut off at the end of the stipulated period.

**Cemetery Monuments Being Moved**

Cemetery tombstones, some of them marking the graves of residents buried a hundred years ago, are being removed from the rear of St. Andrew's United Church, Markham, and taken to Elmwood Cemetery on the highway.

This burying ground at the rear of what was the former Markham Methodist Church has been unused for more than half a century.

During the great flu epidemic in the '30's, entire families were wiped out, and some of the stones being removed testify to this tragedy.

**Give Your Chicks a Flying Start . . . Then Keep Them Coming!**

There's your recipe for poultry profits this year . . . especially this year. So many yearlings have been sold, so few chicks started, that it's a foregone conclusion that egg prices will be high next Fall. But that won't do you any good unless you have big well-grown pullets laying big eggs while the prices are high.

The way to get big well-grown pullets laying plenty of big eggs when big eggs mean real money is to start good chicks . . . start them "flying" . . . and keep them coming. And here are the feeds to do the job! Come on in and talk it over.

**Purina CHICK STARTENA**  
**Purina GROWING CHOWS**

Changes in Purina formulas and feeding recommendations have cut two weeks off feeding time, to market, and \$3 per pig off feed costs. This isn't just "talk"—it's a proved fact, proved at the Purina Research Farm in actual feeding tests. The chief change is to make use of the higher feed efficiency of young pigs by feeding Sow and Pig Chow (1 Chow-4 chop) right through to 100-125 lbs. Try it on a litter, this Spring, and see how it works out!
