

County Council Inspects Lands and Forests Station

Accompanied by Mr. A. A. MacKenzie, M.L.A. for North York, members of the York County Council inspected the Research Station of the Department of Lands and Forests at Maple recently.

The visitors were escorted through the various buildings and saw the staff biologists and scientists at work with test tubes, analyzing water and soils, and experimenting with new equipment designed to facilitate the work of the fire fighters.

In the fisheries laboratory they were shown the new pressure chamber for determining the depth and pressures under which various species of fish will survive. They also saw many species of fish in tanks undergoing experimental tests of one kind and another, results of which are carefully checked and recorded.

The soils laboratory afforded them the opportunity of seeing how soils are analyzed and moisture content determined.

In the radio station, which is in direct contact with every district in the province and has a teletype system to head office in the Parliament Buildings, the intricacies of the system were carefully explained and demonstrated.

In the nursery section the group showed a great deal of interest in the experiments being carried out to develop various species of aspen, poplar and whitepine rust free for commercial use.

The visitors expressed their surprise at the extent of the work being carried on, and their pleasure that this important phase of departmental administration was located in their own county. This station is fast becoming one of the outstanding biological research centres in the country.

Identical Triplet Shorthorns Exhibited at the Fair

These calves—identical triplet Shorthorns and very unusual—were exhibited at

Markham Fair by C. S. Carruthers of Markham Township. The Tribune photographer first snapped the babies

at birth, eight months ago. Many readers may recall the picture taken at the home farm on the 10th concession.

WOOD IN FRUIT CAKE GOVERNMENT'S FAULT

A lawsuit against a baker accused of selling a fruit cake containing pieces of wood was dropped today when the judge ruled the wood was in dried fruit sold by the government.

Every picture tells a story, says an artist. He hasn't seen some of the movies we have.

Some mothers hire a baby sitter when what they really need is a lion tamer.—St. Thomas Times-Journal.

Girl Ph.D. Has To Ward Off Bearded Alaska Suitors

Six weeks ago, Dr. Philippa Pollenz, Brooklyn anthropologist, left for Alaska and the Yukon to get pictures of Eskimo and Indian dances. She hit town richer by 300 feet of movie film on the most primitive Eskimos, Indian still pictures, and "about 80 proposals from those bearded sordoughs." Miss Pollenz doesn't look the "doctor" type. She appears to be on the right side of 30 (age wasn't mentioned) and has a Ph.D. from Columbia university. Doing her doctor's thesis on primitive dances got her working for the Dance Research foundation, founded two years ago by Brooklyn philanthropists.

The foundation now has 250,000 still pictures and thousands of feet of movies showing native dances around the world. It lends its services to universities and libraries and sells research information to Hollywood.

Accompanied by her mother, Miss Pollenz took a steamer from Vancouver to Juneau and Skagway, train to Whitehorse, plane to Fairbanks. She returned to Seattle via the same route. While there, they hope to buy more pictures from Canadian photographers who had visited the Arctic.

She was able to buy 300 feet of film showing Eskimos from the isolated King Islands dancing during fur trading at Nome. Their native costumes were all that an anthropologist could ask for—except for white T shirts with "Nome" across them.

Those Eskimo terpsichoreans would never draw crowds to our theatres, she admits. The men dance quite vigorously but the women remain swathed in furs from head to toe while dancing languidly. They don't have to worry about pleasing the cash customers.

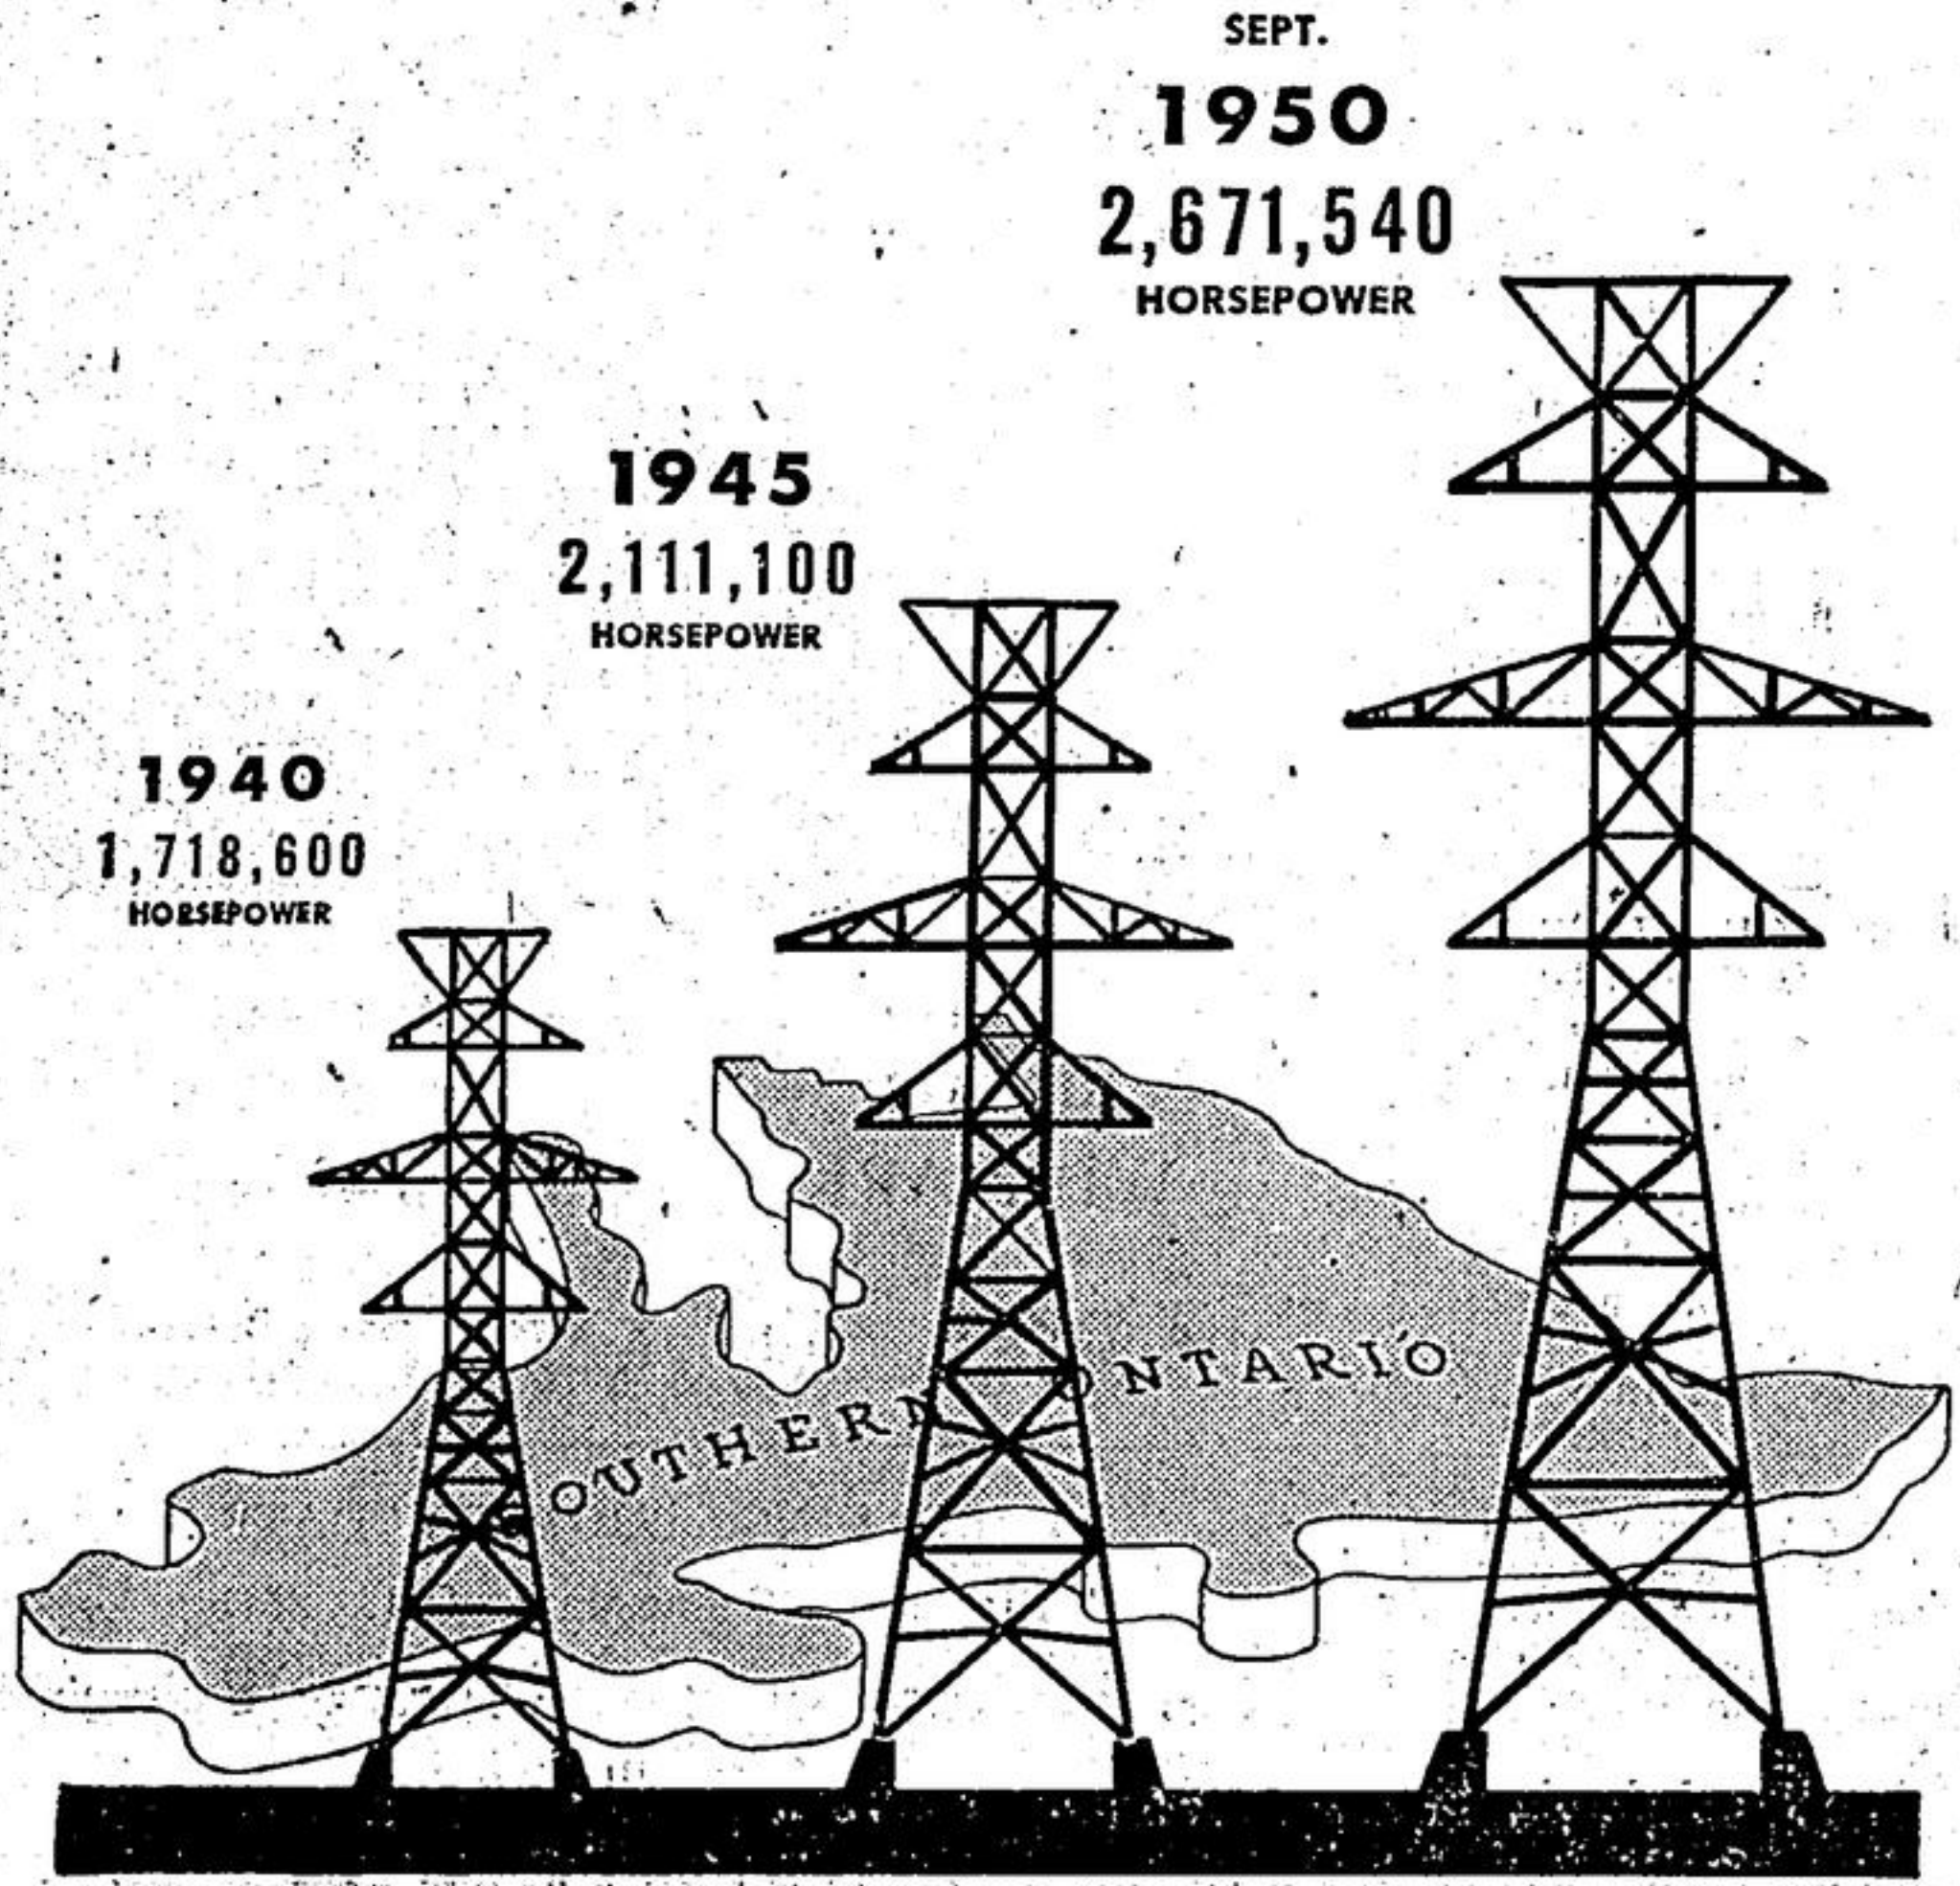

Miss Pollenz said pictures showed a similarity of hand movements in dances from India, Hawaii, the Far East and B.C. B.C. Indians are dancing less and doing so in secret, she revealed.

"If a girl is a nurse or will work as a waitress, she could do well in Alaska, observed Miss Pollenz. She would have to beat off suitors. It wouldn't matter if she were 60." "I think you could move that up to 80," remarked her mother.

Anxious for Industrial Assessment in Whitchurch Twp.

"We need industrial assessment in this district," John W. Crawford, Whitchurch/Township clerk-treasurer, told members of the Oak Ridges-Lake Wilcox Ratepayers' Association at the general meeting held recently. "You bring me a good industrial prospect and I'll fight to help with getting it located," he said.

Explaining that industry was needed to help carry the burden of school and other taxation, Mr. Crawford said that his council was, he was sure, ready to help in every way. "But you people have to help too," he told his audience.

Your Hydro is growing fast - but

In 10 years your Hydro has increased the power supply to Southern Ontario by 952,940 horsepower, over twice the combined power requirements of the cities of Windsor, London, Hamilton, Peterborough, Kingston and Ottawa . . . and there will be more power within the next few months.

Ontario's growth has been amazing. Since 1947 the population has increased by 323,000, over 70,000 new homes have been constructed, approximately 700 new industries have been established and the value of production has risen an estimated 1½ billion dollars, 88,541 new rural consumers have been supplied with Hydro and the value of agricultural production has increased by some 400 million dollars . . . all of which called for power in greater quantities than at any previous time.

BUT—in addition to this tremendous growth, the recent step-up in industrial activity due to defence rearmament contracts has brought about a sharp increase in the use of electricity. In the past few weeks the maximum primary demand in Southern Ontario has been as much as 400,000 horsepower (298,000 kilowatts) higher than a year ago . . . an increase 5 times greater than the long term average rate of growth. For this reason your Hydro urges everyone to co-operate in the conservation of electricity.

Don't forget to put orders in for Canada Savings Bonds for the children.

Nice thing for George or Mary for university or marriage.

Barbara Brent's BUYS AND WHYS

A WEEKLY INFORMATION SERVICE

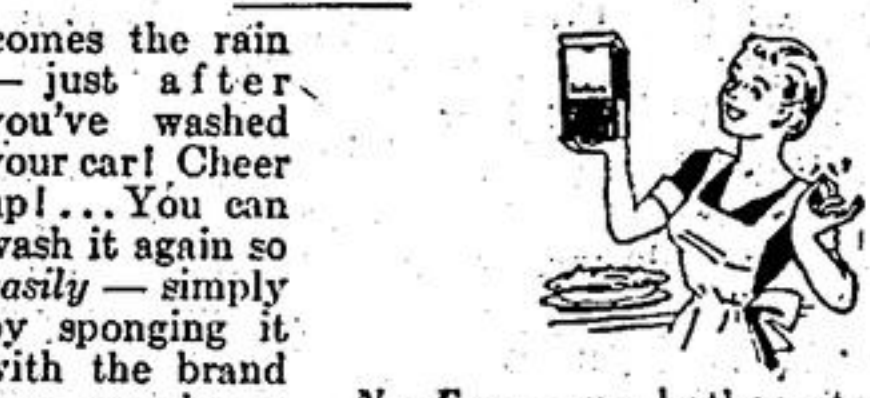

MONTREAL—A friend of mine was looking tired. "I ache all over from Fall house-cleaning. Can't sleep at night," she said. "That's when to reach for SLOAN'S LINIMENT!" I told her. For, truly, Sloan's is the most relief-bringing treatment I know for rheumatism, sore muscles, stiff neck, or neuralgia. Its soothing, penetrating heat gets right to the heart of the pain. Just pat it on and it works wonderfully quickly to bring welcome relief! No wonder Sloan's is a medicine cabinet "must" in so many homes! And it's not expensive . . . just 40c a bottle at any drugstore.

Absolutely Free! . . . here are cardboard cut-out toys your youngsters will be thrilled to own! Designed by the folks at Heinz (and very well, too!) . . . there are big cardboard cut-out trains or make-believe modern kitchens to delight both boys and girls. All you do to get yours is purchase 6 tins of that delicious HEINZ CREAM OF TOMATO SOUP at regular prices. The tins are packed in "toy-maker" cartons . . . the toys are printed in colour and semi-cut on the carton. There are four kinds of cut-out cartons:—

1. Locomotive and freight car.
 2. Flat car and Caboose.
 3. Stove and Sink Unit.
 4. Refrigerator and Cupboard.
- Ask your grocer for 6 tins of Heinz Cream of Tomato Soup in the new, toy-making carton . . . OR—write to me—Barbara Brent, 1411 Crescent St., Montreal, P.Q.—enclosing 6 labels from any variety of Heinz Soups—telling me which of the four toy-making cartons you'd like (you can have all four for 24 labels!)—and I'll send your "toy-makers" to you—post-haste.

Oops! . . . there comes the rain—just after you've washed your car! Cheer up! . . . You can wash it again so easily—simply by sponging it with the brand new, grand new C-I-L SPONGE. And, if your husband is the Official Car-Washer in your family, I'm sure he'll agree with me that this C-I-L cellulose Sponge is the grandest thing ever invented for cleaning or polishing a car. It's velvet-soft when wet—kind to the finest finish. And when rung out, it can be used as a chamois. There are lots of other things you'll like about this durable C-I-L Sponge . . . why not try it and find out for yourself? You'll find C-I-L Sponges in five convenient sizes at hardware, drug, variety, department or grocery stores. Be sure to look for the C-I-L label—it's your assurance of quality.

No Fuss—no bother at all! It's as easy as making a DURHAM CORN STARCH Lemon Pie to open the new "Durham" package! Just break the seal and inside you'll find Durham Corn Starch neatly protected in a paper bag. Then, when you've used as much "Durham" as you need at the time, replace the top of the package. It will protect your corn starch from dust 'til the next time you need it. And for the best Lemon Pie recipe you've ever tried—just look at the side of the "Durham" package. There you'll find a special Ann Adam Lemon Pie recipe . . . delicious!

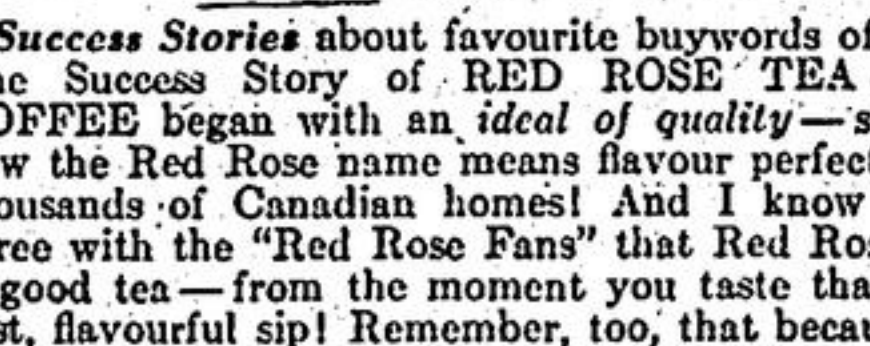

I'm Really Thrilled . . . and you'll be too, when you see the FRIGIDAIRE De Luxe Cold-Wall REFRIGERATOR. It's so beautiful with its Ice-Blue interior trim . . . and so wonderful "in action." For example, its big, full-width Super-Freezer Chest holds up to 45 lbs. of frozen foods . . . while its huge Hydrator keeps fruits and vegetables fresh and crisp for days. Look twice at those roomy, all-aluminum shelves, too . . . for they're tip-proof, rust-proof and edged with Ice-Blue. Yes, "made by General Motors" means a lot in electric refrigerators . . . so visit your Frigidaire Dealer soon, for the thrill of your life!

If I Were On A Quiz Program, and had to answer this question "What is clear and sparkling, has 7 tempting 'locked-in' flavours, is a favourite across Canada?" I know I'd take the prize. Because what else could it be but Jell-O? The twinkling, shimmering colours of Jell-O are a sure sign of the tempting flavour that follows. And the variety of flavours makes JELL-O JELLY POWDERS a homemaker's dessert and salad dream—they offer such a wealth of glamorous combinations. I don't forget Jell-O economy when I'm planning the budget, either. It offers one of the most inexpensive desserts I know of—less than 2c a serving!

I Like To Tell You Success Stories about favourite buywords of mine. The Success Story of RED ROSE TEA AND COFFEE began with an ideal of quality—so that now the Red Rose name means flavour perfection in thousands of Canadian homes! And I know you'll agree with the "Red Rose Fans" that Red Rose Tea is good tea—from the moment you taste that very first, flavourful sip! Remember, too, that because it's good tea, it actually gives more cups to the pound—its flavour goes a long, long way! Red Rose Coffee is as good as Red Rose Tea. Always fresh—always flavourful—once you've tasted this full-bodied coffee, you'll never be satisfied with any other! So do ask your grocer for these Red Rose successes—the flavour-wise tea—the taste-satisfying coffee. I'm sure you'll make a year-round, clock-around habit of them!

When The Frost Is On The Pumpkin, and all the family snuggles around the fire, I like to serve a piping hot chocolate drink. And I don't know of anything more wonderful than BAKER'S UNSWEETENED CHOCOLATE for a drink full of nourishment and luxurious chocolate flavour. Baker's is, of course, all pure chocolate with nothing added, nothing taken away, making all chocolate flavoured dishes more rich and satisfying. Here's the recipe for Hot Chocolate that would make a French-chef green with envy!

- | | |
|---|---------------------|
| 2 squares Baker's Unsweetened chocolate | 3 tablespoons sugar |
| 1 cup water | Dash of salt |
| | 3 cups milk |
- Add chocolate to water in top of double boiler. Stir over low heat till melted and blended. Add sugar and salt; boil 3 minutes, stirring constantly. Place over boiling water. Add milk gradually, stirring constantly, then heat. Just before serving, beat with egg beater till frothy. Serves 6.
