**Plans Made for Ont.
 C'nty Plowing Matches**

The arrangements for the Plowing Matches which are held annually in Ontario County have now been completed. The South Ontario Plowing Match will be held on Wednesday, October 1st, on the farm of Mr. E. L. Ruddy, Pickering, Ontario. The match will be held on the north part of the Ruddy farm about one

mile north and one-half mile east of Pickering village.

The North Ontario Match will be held the following day, Thursday, October 2nd, on the farm of Mr. Allen Smith, Sandford, Ont. Mr. Smith's farm is located about one-half mile north of Sandford village on the east side of the road.

Both of these Plowing Match Associations are offering over \$600 in prize money and they have a full programme of classes to cover the beginner who is coming out to his first match and for the more experienced plowmen who have plowed for several years.

For further information and prize lists contact Oscar Downey, Myrtle, Ontario, Secretary, South Ontario Plowmen's Association, and Alex Noble, Uxbridge, R.R.2, Secretary-Treasurer, North Ontario Plowmen's Association.

In order to give Junior Farmers the opportunity of some coaching before these two matches, the Department of Agriculture in Uxbridge has arranged two coaching classes. One coaching class will be held on the farm of Murray Dunkeld, Claremont, on Saturday, Sept. 20th. The following Saturday, Sept. 27th, another coaching class will be held on the farm of Russell Morrison, Beaverton. All Junior Farmers and others interested in improving their knowledge of plowing are invited to attend these coaching days. Please remember—Saturday, Sept. 20th, at the farm of Murray Dunkeld, Claremont, and the following Saturday, Sept. 27th, at the farm of Russell Morrison, Beaverton.

Quadrifocal glasses are now available. It is said they enable a person to stand in the middle of a week and look both ways for Sunday.

**Four First Prizes
 In C.N.E. Judging for
 York Junior Farmers**

Four first prize winners and many others well up in the money was the record established by York Junior Farmers in the C.N.E. Judging Competitions. The competitions brought out 301 contestants from all parts of Ontario and each of the various classes were well filled.

Bob Armstrong of Armitage was the winner in horse judging for seniors, while Bob Petch of Gormley, R.R.2, was winner in the senior Farm Machinery Section. In the junior classes, open to 4-H Club Members, Sylvia Easton of Gormley, R.R.2, was the winner in the Beef section in a class of 41. Margaret Arkinstall of Newmarket was fourth in this class. Gordon Brumwell of Gormley R.R.2 was the winner in the junior Farm Machinery test.

In Dairy Cattle judging, Carl Boynton of Woodbridge was fourth and Donald Brodie of Gormley was third in very large classes.

The competitions are open to anyone under 16 years of age and it is interesting to note that the prize winners are all active Junior Farmers or 4-H Club members.

Recently one astronomer said there was dust 10 inches deep on the moon, and another said there was no soil on the moon. As neither has ever been to the moon, we don't know which one to believe.

**Farm Accidents
 Can Be Serious**

Even no-fatal accidents and fires on the farm often cause more disruption than similar occurrences in other businesses, it is pointed out in an article "Accident Hazards on the Farm," in Canada's Health and Welfare for June, a publication of the Department of National Health and Welfare.

The temporary lay-off of one member of the family farm can often reduce production considerably, for he can seldom be replaced effectively. The destruction by fire of farm home or important buildings and equipment can virtually bring operations to a standstill, for unlike less seasonal business, operations cannot be

resumed almost immediately in a new location.

Survey of farm accidents show that falls, the use of cutting or piercing implements, and crushing, accounts for 71 per cent of the total time lost through accidents. Almost 27 per cent of time lost arises from accidents such as kicks from farm animals and misadventure with tractors and motors. Burns are responsible for the balance.

The majority of farm accidents happen to people in the working years and those between the ages of 14 and 64 account for 84 per cent of all accidents. Fifty-eight per cent occur in the fields and 27 per cent in the home or farm buildings.

Fire is the worst hazard on most Canadian farms, particularly those that are not serviced by electricity, for of necessity inflammable fluids

must be used for illumination and wood must often be used for cooking and heating. During the years 1946 and 1949, 321 rural homes were destroyed by fire, making an average of 80 farm homes per year lost through fire. The death toll in rural fires during this four-year period was 576 persons, something over half of the victims being children.

Authorities agree that education presents the only permanent solution to the dangers of farm accidents. "With an eye to the future" the article concludes, "much of the accident prevention education in rural areas is now being directed to the children, the farm owners of the future. Schools, junior farmers clubs, boy scouts and girl guide movements and many other groups have played a large part in the continuing plan for farm safety."

the low fares appeal to me

"With living costs so high one has to be careful of expenses even when taking a trip. That's why the low bus fares appeal to me—I have a little extra to spend on entertainment or for some of my shopping while I'm away. And travelling by bus these days is really enjoyable."

Men sure go for a
MAGIC cake

**COCONUT FUDGE
 CHIFFON CAKE**

Mix and sift into a bowl, 1 c. plus 2 tbs. once-sifted cake flour, 1 1/2 tps. Magic Baking Powder, 1/2 tsp. salt, 1/4 c. fine granulated sugar; mix in 1/4 c. desiccated coconut. Make a well in the dry ingredients and add in the order given (do not stir mixture), 1/4 c. corn (salad) oil, 2 unbeaten egg yolks, 1/2 c. plus 2 tbs. water, 1 tsp. vanilla, 2 1/2 ounces unsweetened chocolate, melted and cooled. Stir the liquids to intermingle, then stir in the dry ingredients; beat until batter is smooth. Measure into a large bowl 1/2 c. egg whites (at room temperature) and sprinkle with 1/4 tsp. cream of tartar; beat until the egg whites are very very stiff—much stiffer than for meringues, angel cakes, etc. Add flour mixture, about a quarter at a time, and fold after each addition until batter and egg whites are thoroughly combined. Turn batter into an ungreased 8" angel cake pan; bake in a rather slow oven, 325°, about 1 hour. Immediately cake comes from oven, invert pan and suspend cake until cold.
