Winter Fishing

Prospects for winter fishing on Lake Simcoe look good according to Department of Lands and Forests district biologist, W. H. Mc-Crimmon. He advises, however, Mr. and Mrs. Ed. Johnson. Joe. that the weekend angler familiar-George and Linda spent New Years ize himself with the technique of fishing through the ice if he would Miss Shirley Jones spent a few bring home a good catch. Quite a number from Stouffville indulge bylaws and permits. Councillors Wednesday evening with Mr. and in this business of ice-fishing at Lake Simcoe.

Historically, fishing through the ice on Lake Simcoe dates back to Miss June Fiss of Toronto, was the time of the Huron Indians who cut small holes in the frozen surface and, shielded from the cold by buffalo or bearskin robes, speared fish for food.

But times have since changed, . and spearing is no longer legal. Mr. and Mrs. Ed. Johnson and Buffalc and bears have departed the district long since. Lake Simcoe fishermen today rely on little fish houses for shelter. Mounted on and the committee arose with the family and Mr. and Mrs. Jim Peddie skids they can be moved readily. corner for warmth.

Long an important activity for lakeshore residents, ice fishing has been gaining popularity as a sport in recent years. Last winter, some 1,300 fishing shacks were counted over the lake. On week days they are occupied mostly by local fishermen but on weekends enthusiastic anglers come from near and far to try their luck. ning Board may be cut from They rent space in the tiny cabins and enjoy the sport in relative comfort.

Lake trout, whitefish and lake herring are the species most commonly taken, but perch may be in other municipalities the five caught in some areas and pike abound in Cook's Bay at the south is end of the lake. Burbot, or ling,

Biological studies carried out by pected to remain on the Board. I the Department biologist reveal The remaining members would that Lake Simcoe whitefish are be, Chairman, D. Tanner; Vice notable for their small size. They Chairman, D. Rumney; Secretary, spawn in great numbers on the C. Hoover; Members, H. Maynard, shoals commencing mid-November and mature in five to six years. Because of their slow rate of growth they measure but 13 to 16 inches in length and weigh but a half-pound to a pound at that time. In their seventh or eighth year they generally attain a full pound or more in weight but will seldom exceed two pounds even at ten years of age. Perhaps their smaller and firm flesh account for their delicious eating quality.

In contrast, lake trout grow rapidly in Lake Simcoe and compare favourably in growth to On Wednesday evening, Dec. 31, those from other Ontario waters. Mrs. John S.
