## CEDAR GROVE

The second session of the Folk School got underway last Wednesday night at Cherry Hill Farm with even more members of Cedar Grove partaking than last term. For those of you who are a little hazy about what goes on at the school or are not sure of what is available, it might be a good idea to go up one night

as a guest and find out. You may find it quite surprising. At the last meeting in the schoolhouse at one of our social evenings, Alfred Bunker was the guest speaker. Some who would like to have heard him were unable to attend. You may like to know that next Monday evening he is to speak at the meeting of the Unionville Horticultural Society in the Anglican Church at

Unionville. Anyone who missed him in Cedar Grove or who would care to hear him again is most cordially invited to attend the meeting on Monday. The Arch Little's made the news this week with a really wonderful party last Thursday evening which included Euchre, square dancing and of course a delicious supper. Gertrude Shoudy put the veteran Euchre players to shame by taking the first prize, her first attempt at the game. She shared the honors with Frank Sewell who was in top form and looking very well again. Last week we drew attention to the coming Carnival at Unionville. The tickets are now on sale at Hillman's and at the Unionville Arena. If you are planning on attending the Skating Carnival you would be wise to get tickets early and insure a good seat. From all reports this promises to be a gala Carnival. Miss Christine Kennedy is in charge and the Stouffville skaters will be guests on the programme.

## Find Tractors Cause of Most Accidents On Farms; O.A.C. Lists Safety Hints

Personnel of the O.A.C. engineering department never tire of telling farmers about safety. Not when hundreds of serious accidents occur every year and lives are lost simply because safety precautions are not followed.

"Modern farm machinery, while a labor-saving boon to farmers, causes about half the fatal farm accidents," said J. N. Turnbull, agricultural fieldman. "The farm tractor is to blame for the largest number because it is used the most."

**Even Chores Dangerous**

Even doing the chores can be dangerous if you aren't a good housekeeper and fail to keep stairways and ladders in safe condition. With electricity available it is foolish to tramp around in the dark. If you do install lights have a professional job done that will pass inspection.

If there are children around always be sure hay and straw chutes are guarded and tools out of the way. Young and old can fall on slippery walks and paths and it doesn't hurt to a sand pile handy.

Here are some "dos" and "don'ts" for machinery and truck safety.

**Your Safety Steps.**

1. Keep the tractor in safe condition at all times.
2. Drive carefully along steep slopes and banks.
3. Always keep power take-off shield and other safety shields in place.
4. Be careful when crank-

ing any motor.

5. Keep the car and truck in safe condition.
6. Be courteous. Driving is a privilege, not a right.
7. Always assume that the worst is going to happen and be ready for it.
8. Use proper lights and markers on tractors and machines.
9. Teach other drivers by your good examples.
10. Don't drive at unsafe speeds.
11. Don't disobey road signs—they are all for a good reason.
12. If you aren't absolutely sure you can make it, don't pass.
13. Don't drive if you are drowsy, nervous or intoxicated.
14. Don't drive tractors on busy highways unless absolutely necessary.
15. Don't permit extra riders at any time.
16. Don't travel at unsafe speeds.
17. Don't dismount from tractor before stopping power take-off.
18. Don't hitch to any part of the tractor except the drawbar.
19. Don't wear loose clothing. Watch loose clothing.

Farmers may help their wives out by repairing "accident traps" in the home such as medicine cabinets easily reach by children as well as gas lines and matches. It is best to keep young children in play pens or enclosed yards until they realize what the

"danger" means. Although bulls and horses are becoming scarce that does not mean they are not dangerous if you have them around. Here are a few more safety points:

1. Build a safe bull pen.
2. Check harness, stanchions etc. for signs of wear.
3. Treat animals with kindness, but with firmness.
4. Always keep yourself "in the clear" when working with animals.
5. Don't trust the "safe" bull.
6. Don't permit inexperienced persons to handle farm animals.
7. Don't leave a team of horses unattended.
8. Don't wrap either reins or a rope around the wrists

while driving or leading animals.

# Supplying the Defenders of FREEDOM

One of the biggest jobs in the Army — and, in fact, in Canada — falls to the ROYAL CANADIAN ORDNANCE CORPS. This Corps has the huge job of obtaining and distributing everything the Army requires from shoe laces to tanks — over 220,000 different items.

As the Canadian Army grows, the job of Ordnance grows. Right now more men are needed — men who can qualify as storemen, clerks, tailors, shoemakers and canvas workers. The Army will train men in any one of the many different trades and skills required by Ordnance. Once trained, the young man who serves in this Corps will find truly outstanding opportunities for promotions.

With general conditions of service, pay and pension plans at an all-time high, there are wonderful prospects for young men in Ordnance. Learn a trade and build an unusual and important career for yourself in the Royal Canadian Ordnance Corps.

You are eligible if you are 17 to 40 years of age, tradesmen to 45, physically fit and able to meet Army test requirements. Applicants should bring birth certificate or other proof of age when reporting for interview.
