Farmers Present Brief to Provincial M.P. On Behalf of The Provincial Dairy Trade

The York County Federation of Agriculture presented a brief re bill 71 to Major Alex. McKenzie, M.P.P. The brief stated there were 106,000 dairy farmers in Ontario, 1400 processing plants which employed 2300 people. The retail value of the dairy products produced in Ontario is approximately three million dollars. About 15 per cent of this amount is received by those, other than farm people, in countries that allow vegetable oils to compete with dairy produce, the sale of dairy produce has been reduced by 50 per cent. Should this happen in Ontario it is estimated that 14 per cent of Ontario labor would be affected. Any saving to the consumer by substituting dairy products would be more than

offset by a loss in wages. The opinions expressed following the reading of the brief were: That with the dairy produce in plentiful supply and to compare dairy produce prices with other commodity prices, that dairy produce prices were reasonable. That conservation and fertility of our soil depends on our farm live stock, to reduce our cattle population could be disastrous to our economy. The question was asked why there were no names attached to the publicity put out by the edible oils institute. Any requests the farm people make are always signed by names. Major McKenzie gave some interesting information on the new Toronto Metropolitan Area.
