Did Not Signal Driver Fined \$10

Donald Beer of Brougham, pleaded not guilty before Magistrate R. P. Lickie last week to a charge of failing to signal for a left turn, was convicted and fined \$10 and costs or 10 days.

Beer is driver of a bus which brings workers into a local industry daily, and on this occasion a car driven by Ivan Taylor, R.R. 1, Claremont, which was attempting to pass, was hit by the bus which was turning into a gas station to renew air in its tires, and forced off the road into a telephone pole.

Two provincial constables, A. C. Whiteside and J.N. Pocock testified that Beer had admitted giving no signal, and had only come into the station three hours after to report the 9 a.m. accident.

Defence attorney R. D. Humphreys, QC, called several witnesses who had been passengers on the bus to testify that they had seen accused giving a hand signal before using both arms to turn the wheel to get off the road. The bench preferred to believe the constables stressing the special responsibility that is required of bus drivers to observe the rules of the road. T.M. Moore acted for the crown. The accident occurred on No. 7 Highway near Kinsale.

Would we still have square pegs in round holes if the critics took over the jobs of those whom they criticize?

The prison inmate takes little stock in the old expression, "believe in your convictions."

ALUMINUM has a habit of turning up almost everywhere. But "farthest north" was reached recently, when a U.S. Air Force pilot set down his aircraft at the geographic North Pole - on a pair of aluminum skis.

Aluminum's lightness - with strength has made it the basic material of the aircraft industry. And because aluminum is only 1/3 to 1/2 as heavy as other base metals, a pound of it goes a lot further. Which is one more reason why so many manufacturers of so many products have turned to aluminum to help keep their prices down. Aluminum Company of Canada, Ltd. (Alcan).
