A RUSH JOB IS NEVER A GOOD JOB!

Now is the time to have your grain cleaned for seed. The cleaning plant operator can do a better job when he is not rushed. Many plants offer a discount on cleaning in January and February.

Seed drill surveys reveal that one farmer in every four uses substandard (rejected) seed. Don't plant weeds. They cost more than taxes.

PLAN YOUR SEED REQUIREMENTS NOW!

Use registered or certified grades of the improved high yielding disease free varieties suitable to your district. The seal on the bag is your insurance of quality, germination and variety.

The few extra cents spent on sealed seed is good insurance against low yields.
