Considerably more milk is being used this season than a year ago for the manufacture of processed milk products, the Ontario department of agriculture said in its monthly dairy report.

Production of condensed, evaporated and powdered milk products was up 21.4 per cent in March and 10.8 per cent during the first three months of the year.

THE MIXING BOWL

ROLLS
Hello Homemakers! Many bake-shops sell fine rolls, but if you want the double treat of sniffing the delightful aroma of rolls baking, and eating fresh rolls hot from the oven, it is up to you. This is easy with the help of the roll mixes on the grocers' shelves.

These roll mixes contain all the ingredients except the water. You will be delighted with the results if you follow the directions and keep in mind the following tips. By the way, if an extra box is being stored, tuck it down in a cool part of the cupboard.

TAKE A TIP

1. Follow carefully the labelled directions according to the kind you are using. Do not sift.
2. To hasten rising, set in the warming oven of electric range on chopping board. Or place on a cake rack placed over a casserole and pour hot water into casserole.
3. To glaze crust before baking, brush with a mixture of 1/2 tsp. egg yolk and 2 tbsps. water. (We prefer soft crust by brushing with butter after baking).
4. Refrigerator method: You can make a fresh batch every day for 3 or 4 days if you mix all the package, then store, covered, in the electric refrigerator. Clip off desired amount to be baked using kitchen scissors.
5. To serve hot breads, line a bread basket or plate with napkin, then place a piece of plastic over it. Arrange hot rolls on plastic and fold napkin to keep them warm.
6. To reheat rolls or bread, place in double boiler and keep water boiling in lower part for 20 mins. If you have oven turned on or warming oven, place

rolls in paper bag, dampen the paper and heat 10 mins.

Two-From-One
One package roll-mix may be divided and prepared ever so differently—a savory bread for lunch and a sweet for tea.

Onion Loaf
1 1/2 tps. celery salt
1/2 pkg. roll mix
2 cups chopped onion
1/4 tsp. pepper
1 1/2 tps. celery salt
3 tbsps. salad oil
1 tsp. milk
1 egg, beaten

Prepare mix as label directs (refrigerate half for tarts next day) and let rise. Meanwhile, saute onion with seasonings in oil until tender but not brown. Divide dough in half; roll half to fit 10 by 6 by 2 inch baking dish. Spread onion over dough. Roll the other portion; place onion on it. Brush top with milk combined with egg. Let rise until double. Bake at 400 degrees in electric oven for about 20 mins.

Jam Roll Tarts
1/2 pkg. roll mix
1/4 cup bran
1/2 cup peach jam

Let chilled dough come to room temperature (about 1 hr.) Roll 1/4 inch thick. Cut with 3 inch cutter. Line muffin tins to halfway with dough. Mix bran with jam and drop by spoonfuls into center of each muffin cup. Lightly grease edge of dough. Cover with clean tea towel and let rise until double. Bake at 400 degs. in electric oven for 20 mins. Make 8 sweet rolls.

Quick Method Rolls

Prepare package of roll mix according to directions. Roll dough into a 10 by 6 inch rectangle and place in rectangular casserole of this size. Dip a long sharp knife into hot water and wipe dry; with this cut dough (up-and-down motion) into 1 inch squares. Let rise until double. Bake at 400 degs. in electric oven for 15 minutes. Turn out, brush with butter. Break off servings when lukewarm.

Biscuit-Mix Rolls
1 pkg. yeast granules
2 tbsps. warm water
1/2 cup warm milk
1 tsp. sugar
2 1/2 cups biscuit mix

Sprinkle yeast on lukewarm water. Let stand 5 mins. without stirring. Add to milk. Add sugar and biscuit mix. Beat well. Place dough on well-floured board and knead gently 40 times. Shape rolls; place on greased baking sheet; cover; let rise until double. Bake at 400 degs. in electric oven about 15 mins. Serve hot. Makes 1 dozen.

THE QUESTION BOX

Mrs. H. C. asks: When you roll out biscuit dough made from a package mix, should we use flour or biscuit mix on the board?

Answer: We use flour.
Mrs. S. W. asks: What is the secret of success for high popovers?

Answer: Some folks make the mistake of not sifting the flour before it is measured. Others do not have success with popovers because the greased pans are not heated in a hot oven for 5 mins. before the batter is spooned into each cup or muffin pan.

Mrs. F. H. asks: How long should we allow for rolls (made the old-fashioned way with potato water) to rise double in the electric warming oven?

Answer: A batch of dough using about 6 or 7 cups flour usually requires 2 hours. Do put the pan of rolls on chopping board placed on bottom of warming compartment.
