

Scripture—Mark 16:15; Acts 2:14-41; Romans 10:8-15; 1 Corinthians 1:18-25; Colossians 1:24-29.

Jesus appeared to His eleven disciples and gave them His command, that they should go into the world and preach the gospel to all creation.

When the Holy Ghost fell on the disciples, they talked strangely, seeming to be drunk. Peter, standing with them, told the people to listen to his words.

Then Peter talked of Jesus whom they had crucified but who was raised from the dead, and he called upon his hearers to repent and be baptized.

"Whoever shall call upon the name of the Lord shall be saved." But how could they believe without a preacher? MEMORY VERSE—Romans 1:16.

### The Golden Text

Jesus appoints the twelve.

"For I am not ashamed of the gospel of Christ; for it is the power of God unto salvation to every one that believeth; to the Jew first, and also to the Greek."—Romans 1:16.

### THE CHURCH PROCLAIMS THE GOSPEL

The good news is for everyone. Scripture—Mark 16:15; Acts 2:14-41; Romans 10:8-15; 1 Cor. 1:18-25; Colossians 1:24-29.

By Newman Campbell  
OUR LESSON today is about the first Christian missionaries, the men who had shared Jesus' life on earth, talked with Him after His Resurrection, and received His command, "Go ye into the world, and preach the gospel to every creature."

Even the smallest children can understand the joy of telling glad news to others. A new baby has come to the home; a friend who has been ill is better; a happy time is looked forward to and will be shared with friends.

So these friends of Jesus wanted to share their knowledge of Him to all the world, not only because Christ had told them to do so, but because they wanted to spread the glad

tidings. After Jesus' ascension the Holy Ghost fell upon the disciples, as you remember from a recent lesson and they began to speak in strange tongues. They were Galileans, but were speaking like other nations—the Parthians, Medes, etc. Some sneered that the disciples had partaken of too much wine.

"But Peter, standing up with the eleven, lifted up his voice, and said unto them (courtteously), Ye men of Judea, and all ye that dwell in Jerusalem, be this known unto you, and hearken to my words: for these are not drunken, as ye suppose . . . Hear these words:"

Then he spoke of Jesus of Nazareth, saying He was "approved of God," as they very well knew because of His many miracles. He reminded them of His death on the cross and how God had raised Him from the dead.

Peter then quoted David who prophesied that God has promised that One of his descendants would be the Messiah, ending his speech with: "Therefore let all the house of Israel know assuredly, that God made that same Jesus, whom ye have crucified, both Lord and Christ."

Being told to repent and be baptized, after their anxious question, "What shall we do?" nearly 3,000 were received into the brotherhood.

Writing to the Romans, whose church he had organized and preached to, Paul wrote: "If thou shalt confess with thy mouth the Lord Jesus, and shalt believe in thine heart that God raised Him from the dead, thou shalt be saved."

"For with the heart man believeth unto righteousness; and with the mouth confession is made unto salvation. For the Scripture saith, Whosoever believeth on Him shall not be ashamed."

For there is no difference between the Jew and the Greek, for the same Lord over all is

rich unto all that call upon Him. For whosoever shall call upon the name of the Lord shall be saved."

Then Paul makes a plea for missionaries to carry the good news to the world. He writes: "How then shall they call on Him in whom they have not believed? and how shall they believe in Him of whom they have not heard? and how shall they hear without a preacher?"

"And how shall they preach, except they be sent? as it is written, How beautiful are the feet of them that preach the gospel of peace, and bring glad tidings of good things!"

How many brave men and women have left their own people and their own countries to bring these glad tidings to people in far lands? Possibly some of the children in your class have relatives who are missionaries to foreign lands, and the youngsters have had a chance to listen to them tell of their experience. It is always a great occasion when such a missionary comes to visit the church at home and tell the congregation and Sunday school of his or her life in faraway lands.

There may also be some young men in these Sunday school classes who are facing the question, "Maybe God may want me to become one of His ministers to carry the good tidings to all men."

MEMORY VERSE: "For I am not ashamed of the gospel of Christ; for it is the power of God unto salvation to every one that believeth; to the Jew first, and also to the Greek."

—Romans 1:16

The control system of a new guided missile has approximately 1,500,000 parts.

Peter Gowland, Hollywood's famous photographer of glamorous starlets, recently shot the world's largest pin-up negative—30 x 40 inches.

Chemistry is no new industry in America. The first chemical plant was opened in Boston in 1635, making saltpeter and alum. Now more than 9,000 companies manufacture thousands of chemicals.

Nature gave you a neck to hold your head up, but pride can help out a lot.

## NEWS FOR THE FARMER

**Method of Canning Apples**

A new method of canning apples to provide a more continuous process; than formerly, to preserve a better flavour, and to retain the shape of the apple pieces, has been developed by the Experimental Station at Sumnerland, B.C.

Scientists in the Fruit Processing Laboratory at the Station constructed a stainless steel vacuum chamber for the treatment of apple tissue in the

preparation of solid pack canned apples and apple pie filling. The process consists of exposing the apple tissue in this chamber to a vacuum of about 27.5 inches (30 inches on the mercury tube is a complete vacuum) for a period of from five to seven minutes, and then releasing the vacuum with steam. Tested under factory conditions, this chamber proved satisfactory, processing from 550 to 600 pounds of prepared apples per batch in a 15-minute cycle.

**Potatoes as "Boilers" Or "Bakers"**

Most consumers desire mealy potatoes for baking and for mashing but for boiling and serving whole these same customers want a potato which is not mealy, which will hold its form and not slough during boiling, states the Markets Branch, British Columbia Department of Agriculture.

Potato chip processors and those processing frozen French

fries desire mealy potatoes or those high in specific gravity. On the other hand, the potato canning trade must have low specific gravity potatoes, which remain firm and whole after cooking. Thus consumers desire potatoes that possess certain characteristics depending upon how they are to be cooked and the purpose for which they are to be used. There is no such thing as a general purpose potato because all varieties vary extensively within the same lot.

By separating lots of potatoes into specific gravity groups according to whether they sink or float in salt solutions, each lot can be labelled and advertised according to their best cooking purpose, such as "Ex-

cellent for Baking", "Guaranteed to be Mealy", "Will Not Fall Apart When Boiled", etc.

Experiments conducted by the B.C. Department of Vegetable Crops, indicate consumers are willing to pay 7 cents more for 5 pounds of "Bakers" than for the same potatoes unseparated as to specific gravity without any reduction in volume of sales. Consumers also paid more for "Boilers" than for the same potatoes unseparated.

**Nursery in Mexico Speeds Canadian Wheat Breeding**

In order to speed up the development of wheat varieties resistant to new virulent races of stem rust and leaf rust, the Canada Department of Agriculture established in October, 1934, a wheat breeding nursery on a farm near Ciudad Obregon on the west coast of Mexico, reports Dr. R. F. Peterson, Cereal Breeding Laboratory, Winnipeg.

Previously wheat breeders in Canada could grow only one crop of wheat hybrids on a field scale under rust conditions each year. Several greenhouse crops could be grown each year, but on a much smaller scale. The new nursery in Mexico makes it possible to grow two fullscale field nurseries of hybrid wheats under rust conditions each year, one in Canada and one in Mexico.

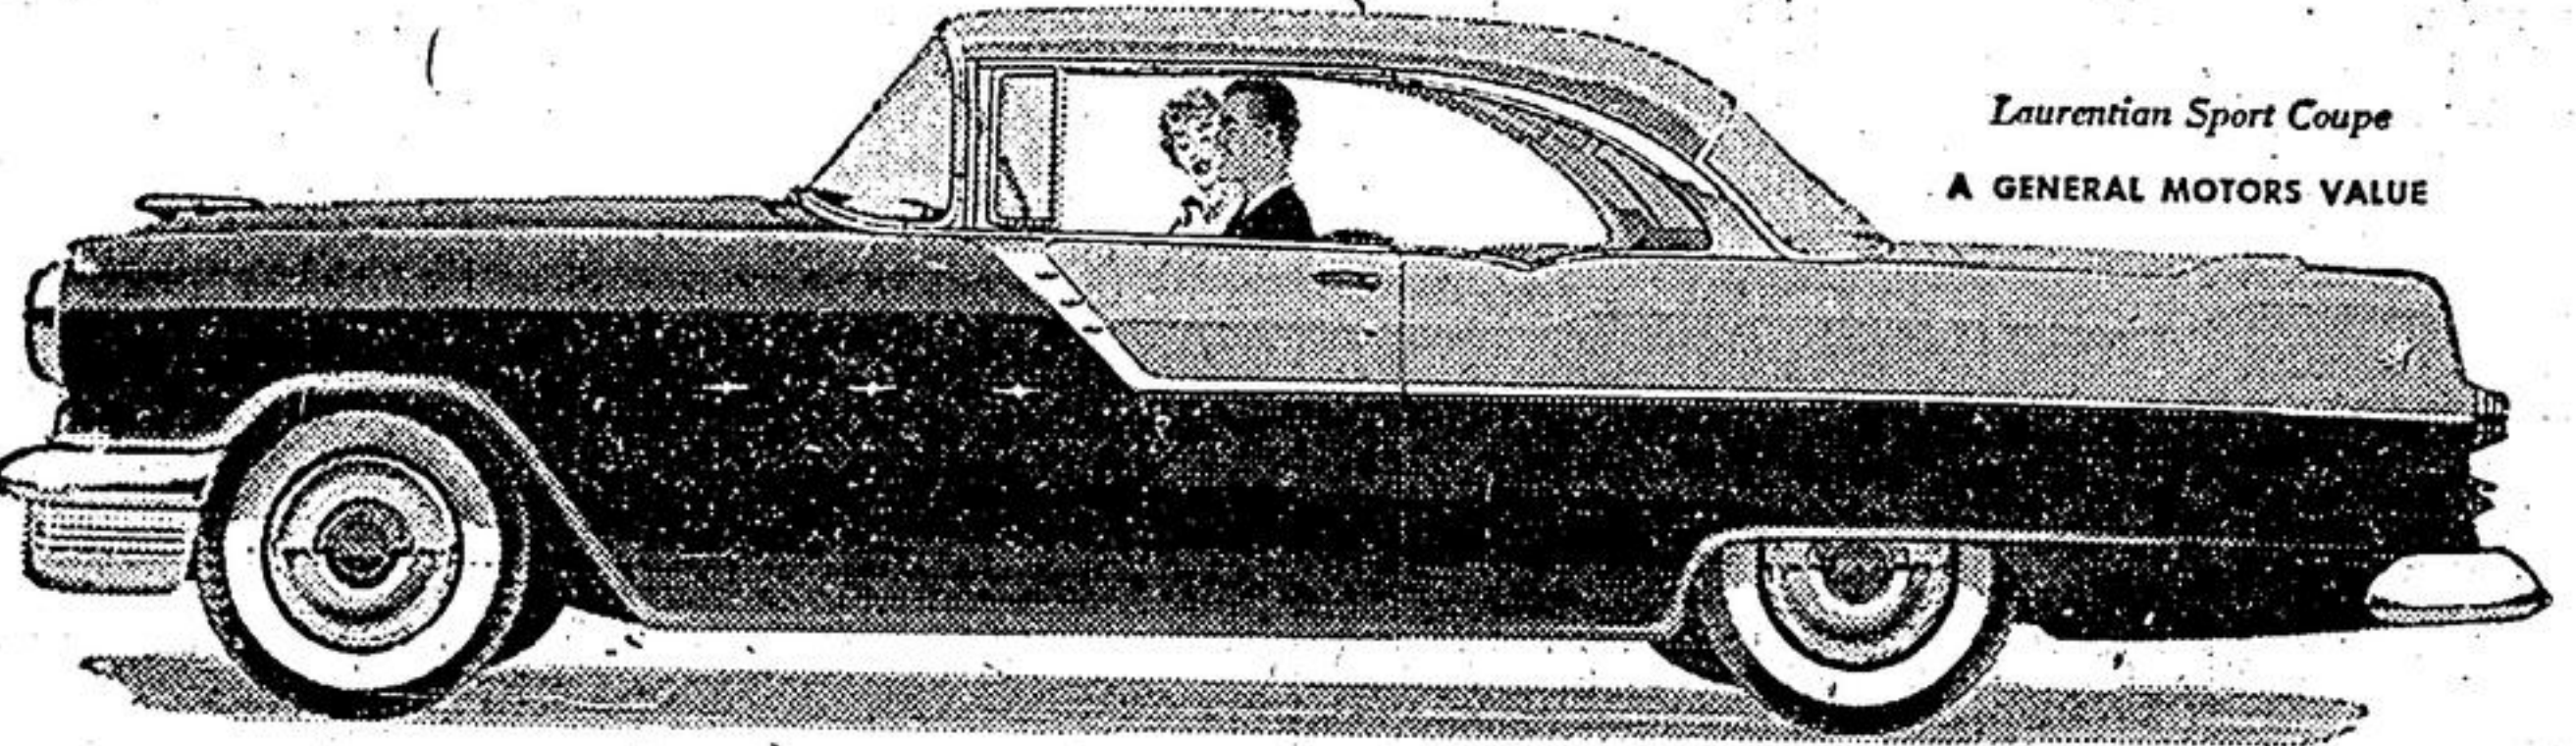

In August and September, 1934, the wheat breeders at Winnipeg selected in their plots over 3,000 hybrid lines from various wheat crosses that were resistant to rust occurring there, and prepared the seed for sowing in Mexico. These lines were sown, each in a seven-foot row, in the Mexican nursery along with some introduced wheats of interest as potential parents in future breeding work. A smaller number of plots of oats and barley were included.

The entire nursery of nearly 3,500 plots occupies 2 1/2 acres. It will be ready for harvest about the end of March or early April. Shortly before harvest two scientists from the laboratories at Winnipeg will go to Mexico to select hybrid plants and lines having resistance to rust races occurring in western Mexico, and to bring back the seed. These selected lines will be sown in western Canada in May, 1935, a year earlier than if the material had all been developed in Canada.

Other plant breeding institutions growing wheat, oats or barley nurseries on the same farm are the State Experiment Stations of Wisconsin, Minnesota, North Dakota, South Dakota, Montana, and Washington. The field containing these nurseries is surrounded by an irrigation canal, and has a grid of smaller canals, cutting the field into units 37 x 74 feet in size, each containing 283 plots laid out in four series with separating paths. Ingeniero Teodoro Enciso, a graduate of the National Agricultural College at Chapingo, Mexico, supervises the growing of the crop.

The departments or institutions submitting seed for a nursery have contracts with the Rust Prevention Association, Minneapolis, Minn., which in turn has an over-all contract with the farm owner who provides the land, local supervision and labour. The Mexican Department of Agriculture is particularly interested in the breeding program and its co-operation is invaluable.

# Here's the car you asked for

**YOU ASKED FOR ALL-NEW BEAUTY . . . and here it is!**

The '35 Pontiacs boast the longest, lowest, built-for-beauty lines ever . . . enriched by a massive gleam of bright metal, front and rear . . . and completed by a striking combination of brilliant colors.

**YOU ASKED FOR LUXURIOUS NEW COMFORT . . . and here it is!**

Pontiac's complete chassis change includes a brand new frame, new front and rear suspension and tubeless tires . . . making Pontiac's amazingly smooth ride the ultimate in comfort!

**YOU ASKED FOR SURGING NEW POWER . . . and here it is!**

All-New 145 h.p. valve-in-head BIG "6"

Tops in economy, backed by big-car power and performance. The finest performing valve-in-head "6" engine in the automotive industry!

All-New 162 h.p. valve-in-head V8 Strato-Flash

Eager power, flashing performance and a money-saving mind about gas . . . all yours with this great new valve-in-head Strato-Flash.

All-New 180 h.p. valve-in-head V8 Strato-Streak

A super powered, brilliantly performing engine, that backs up your slightest toe-touch with action! The newest, greatest valve-in-head V8 in Canada!

**YOU ASKED FOR A STUNNINGLY STYLED INTERIOR . . . and here it is!**

Feast your eyes on the fabulous Pontiac interiors! You'll see a completely new instrument panel with recessed controls . . . you'll find more room, deep-seated comfort and true-angle seat backs for relaxed riding . . . you'll enjoy the feeling of real motoring luxury!

**YOU ASKED FOR A WRAP-AROUND WINDSHIELD . . . and here it is!**

Pontiac's wide open and wonderful wrap-around windshields give you all-lander visibility! Thanks to the 18% increase in see-through visibility, you really see all 'round, both front and back, for more pleasure and safety.

SEE THE '35 PONTIAC AT YOUR LOCAL DEALER'S NOW!

All that you've ever wanted in a car is yours with '35 Pontiac that's NEW...all NEW right from the ground up!
