Rumours abroad in town that the proposed sewerage system will not take cellar drains is absolutely false, since all drains—septic, cellar, wash water and all—would be taken care of. Other rumours of fabulous costs, as much as \$100 a year for a householder, are just as false and are spread only by those persons most ignorant of the facts. Those who are most interested in the progress of Stouffville should see that such false stories are stifled whenever they hear them.
