

RCMP Protects Bathers Against Motor Boats

The R.C.M.P. have warned users of motor boats in Musselman's Lake to take extra precautions in order that bathers and long-distance swimmers might not be injured. In past seasons many cottagers have registered complaints concerning the use of high-powered boats on the lake. This summer the Mounties moved in to study the situation. They have asked bathers to report any power-boat operators to their head office who disregard the rules of safety. Many Lake residents feel that motors no larger than ten horsepower should be used on boats.
