

DR. D. MCGILLIVRAY BORN IN PICKERING

A private funeral service was held last week in his home on Egin Ave. for Dr. Donald McGillivray, 89, who practised medicine in the city until his retirement a few years ago.

Born in Pickering, Dr. McGillivray was educated in Whitby schools. He was a druggist in Uxbridge and graduated in medicine from the University of Toronto in 1897 and from Trinity University in 1899. Following postgraduate work in England, he became a member of the Royal College of Surgeons and a licentiate of the Royal College of Physicians.

For a number of years, Dr. McGillivray was on the medical staff of the University of Toronto. Active in the Royal Grenadiers of Toronto for some time, he went overseas in 1914 with No. 4 Canadian hospital and served with that unit at Salonika with the rank of Lt.-Col. In 1917 he was invalided back to Canada and was appointed consultant to the Dominion medical examining board, a post he held until the end of the war.

Dr. McGillivray was an honorary life member and physician of the St. Andrew's society of Toronto and an honorary life member of the Aesculapian club. He belonged to the Toronto Hunt club and was a member of St. Andrew's Presbyterian church. He is survived by his widow.

BALLANTRAE NEWS

There was a Ratepayers meeting held last Thursday at Ballantrae school. There was a good turnout and it is the hope of the school board that as many people will come to their annual meeting on Dec. 26 of this year.

Mr. Vern Davies, chairman of the school board, told us how hard it is for our Grade I teacher to teach children who are not quite ready for school even though they may be six. We would like to take this opportunity to impress parents of preschool children with the importance of a nursery school training. Some parents feel the only purpose of a nursery school is to give mothers a free afternoon. This is not true; it is to help the child to adjust himself for school, and to learn to mix with other children.

For example, a child who has not had playmates before attending school finds himself in a room full of confusion. Later he may be able to adjust himself but there are those who can't, and they end up crying all day, wanting to sit on the teacher's lap for comfort or they will hate school. While feeling this way, the child is not learning and therefore may end up repeating a year. The nursery school is the ground work for a kindergarten which we hope to hold in our school at some future date when it is not so overcrowded.

Many of our good friends and neighbors are on the sick list these days. We do wish them a speedy recovery.

Don't forget October 10, folks, the date of our next Home and School meeting. Do come and bring a friend. Remember the point system. We feel sure your child will be proud to have the pennant hung in his or her room at school. Also do become a member. The Home and School Association has a goal this year and we want all the members to feel they took part in it, so bring your dollar and get your membership card. If you don't have it this month, bring it next month. Come and enjoy yourself.

Many friends and neighbours are sorry that Bill Yakeley was in an accident. The last report was that he is coming along fine. We know too well that accidents are not planned. If they were, there wouldn't be any, and we know that many parents

MOSTLY WAGES

STEEL PRICES are not simply the aggregate of costs in a steel mill. Others also get paid, including those who work in iron mines, coal mines, limestone quarries, on railways, steamships, motor trucks, in sales offices, and elsewhere. In fact, all prices are mostly wages and salaries.

So there is an upward pressure on prices with every increase in wages, though investment in better equipment does help to absorb such wage increases.

No one can afford to be indifferent to rising industrial wage costs, for these tend to lead to higher prices. As users of steel in many forms, all farmers in particular are adversely affected when higher city wages raise production costs and selling prices.
