By Betty, Bangay

By Sir Winston Churchill

Volume One -The Birth of Britain

Sir Winston Churchill and his forebears have so indelibly written themselves into the history of Britain they will forever be a part of it. Certainly he is most capable of writing "A History of the English Speaking Peoples." and as the title he has chosen signifies, his interpretations vary considerably from those in most school books.

At school, history is taught a

little at a time and spread over a long period of time. This of course is necessary and unavoidable. But the result is somewhat disjointed. To read history in continuity as one would read a novel is to gain a much clearer insight into the past and clarify a lot of previously blurred conceptions. How many realize for instance, how remarkable it was that during the Roman occupation of Britain in 400 AD, there were centrally heated homes and indoor baths, luxuries not known again until the 1900s? Many such interesting facts are brought to light in Sir Winston's history. This first volume covers the period from the misty times before Britain was even an island till the death of Richard the Third in the final struggle in the War of the Roses.

Last year Life magazine published Volume One and Two, complete with wonderful illustrations. They plan to do the same with Volume Three and 4 this year. Note to Students: The accompanying illustrations would make wonderful notebook material!
