**The Power of a Cent**

At today's values one cent does not buy too much, but start thinking in terms of electric energy and you will be surprised how much a cent will do for you.

A cent's worth of electricity at the average domestic cost can save you hours of hard work. For example, it will . . .

- Operate a floor polisher for 3 hours.
- Operate a vacuum cleaner for 1 1/4 hours.
- Do two wash loads in an automatic washer.
- Operate a drill for 5 hours.
