Whistling past the graveyard

This driver is a lot closer to the graveyard than he thinks. At the speed he's going, even a minor mistake in judgment could cause a major highway disaster. Reckless speed is the cause of too many fatal accidents on the road. And sometimes even the speed limit can be misleading—you can be within the limit and still be going too fast for driving conditions. Here's an easy rule of thumb to guide you to a safe speed: always drive at a speed that will enable you to stop within headlight range. If you're tired, or inattentive—don't drive at all. One simple way to check whether your speed is too high or not is to watch the traffic around you. If you are passing most of the other cars on the road, you are going too fast. If most of them are passing you, you are going too slow. Your Ontario Department of Transport urges you to observe the speed limits—slow down and live!
