B.C. Tree Replanting

John Sytoma,

The technique of aerial seeding is bringing excellent results in British Columbia's forest All logged-off lands of Mac-Millan and Bloedel Limited on Vancouver. Island will have been replanted in three years. By 1962 all trees will be growing on all the open tracts except

From that time on planting to a great extent will follow on the

heels of slash-burning with two-

those being logged.

year-old seedlings being set in rows across the blackened ground. Foresters say days immediately following burning are best for planting. Nitrogen, potassum and phosphorus in the ashes are readily available to scillings at that time, but are leacind away by winter rains.

First the tract is covered from the air with wheat-polsoned to kill mice that would eat the fir seed, and painted green

Aerial planting requires a lot of seed and it is at a premium today because there hasn't been a good seed year at higher elevations since 1945.

more than 6,000 trees per acre and on any yield over 1,000 the crop must be thinned in twenty
