DATED at Stouffville this 4th day of July, 1959. 6-2

## Markham, Vaughan Tps. Richmond Hill Align for Orderly Development

Representatives of the Townships of Markham and Vaughan and the Town of Richmond Hill met together on Wednesday evening, July 15th to form a Permanent Co-ordinating Committee to work out a plan for orderly development of the three areas. The committee will attempt to solve the problems connected with transportation, education, planning, water and sewerage.  
"We must band together now to avoid all the troubles and woes that we would no doubt encounter individually at a later date," stated Mayor Ken Tomlin of Richmond Hill. The mayor stated that Metro was now involved in troubles that are costing \$125,000,000 annually. This expense is caused through the installation of services.  
Mayor Tomlin pointed out that the handling of a joint dog control system between the three municipalities was one example of the wonderful co-operation that was presently enjoyed.  
Reeve Wm. Clark of Markham Township said that there was some doubt whether their agreement with the T.T.C. would be renewed. "If it isn't, we will have to set up a transportation system of our own," he said. He suggested that the matter should be dealt with jointly by councils of the three municipalities. The reeve charged that the development of Markham Township was being held back by the Metro Planning Board. He noted that plans that are four years old are still waiting to be dealt with. He charged that Markham Twp. had made three personal appearances before the Metro Planning Board but on each occasion their efforts were thwarted by Reeve Goodhead of North York Township.  
Reeve Clark termed the set-up of the Metro Planning Board as "ridiculous". He noted that Marie Curtis, who represents an area of a square mile was presently telling Markham Township what they could and couldn't do. Mayor Tomlin charged that Metro didn't even have an official plan but in spite of this they continue to dictate to other municipalities. He said that Richmond Hill was one of the first to adopt such a plan.  
Deputy Reeve Vic Ryder of Vaughan Township suggested that the three municipalities should work together toward the establishment of a joint sewerage plant. He charged that Metro was blocking development in the fringe areas in order that their own area should develop first.  
"As soon as they have all their land filled, perhaps they'll let us expand," he commented.  
"The economy of our municipalities is at stake," stated Dep. Reeve Stan Tinker of Richmond Hill.  
"We are intelligent people, well able to administer our own affairs without Metro's bungling help," he continued.  
Mayor Tomlin advised that all municipalities should enforce a ruling whereby the individual developers should pay for their own services. Reeve Clark agreed with the suggestion.  
The Township of Vaughan has a population of 15,000 and an area of 101.6 square miles. The population of the township has more than doubled in the last ten years. Markham Township has a population of 14,000 and an area of 90 square miles. Richmond Hill boasts a population of 15,000 covering an area of 2,000 acres. During the past ten years, more than 13,000 people have moved into the town. The three municipalities combined have approximately half the population of York County, and almost half the county's assessment.  
"Tonight a milestone in municipal relationship north of the Metro boundary has been achieved," stated Mayor Tomlin. The newly-organized committee will comprise two members of each Council, one member from each council's planning board, one member of each council's engineering department and the head of each council will be an ex-officio member.

## Ontario County Juniors Quinte District Winners

The Ontario County Junior Farmers won the Quinte District Junior Farmer Annual Field Day Trophy and the Provincial Junior Farmers' Association Quinte Track & Field Champions' Trophy at Peterborough on Saturday, July 18.  
The field day is an annual inter-county sports competition for the counties of Durham, Victoria, Peterborough, Northumberland, Prince Edward, Hastings, Frontenac, Ontario and Lennox and Addington.  
The field day began with the softball games in which seven boys' and five girls' teams competed. The Ontario County boys' team won the boys' competition and the girls' team placed 2nd.  
The standing for Ontario County on the track and field events were as follows:  
Boys Tug-O-War 1st, Boys High Jump 1st & 3rd, Boys Relay Race 1st, Boys 100 yd. Dash 1st & 3rd, Boys shot put 2nd, Boys 400 yard Dash 1st, Girls 75 yard dash 2nd, Girls Relay Race 2nd, Girls Ball Throw 1st & 2nd, Girls 220 yd. dash 1st & 2nd, Girls High Jump 2nd.  
The final event of the day was the Square Dance Competition in which the Ontario County Set tied for second place with Prince Edward County. Peterborough County won the Square Dance Competition.  
It was a very successful day as indicated by the keen competition in all events and the fine spectator following each county had for their competitors. After the Square Dance Competition, there was a Field Day Dance in the Memorial Centre arena, Peterborough.  
The boys and girls of the Ontario County Junior Farmers' Association had a very triumphant and highly enjoyable trip to the Quinte District Junior Farmers' Field Day and are to be congratulated for their success.  
Some viruses attack bacteria. A virus, which looks something like a tadpole when magnified tens of thousands of times, uses its tail to penetrate a bacterium's outer coating. Acting as a living hypodermic needle, the virus sends material into the bacterial cell.

## Proper Care Needed For Plumbing Fixtures

Plumbing fixtures in your new home are designed for long life and require a minimum of attention to give maximum service.  
Shiny new fixtures and enamelled surfaces can be dulled or stained within a short time by improper care or excessive use of strong abrasive cleaners. While all household cleaners are mildly abrasive, if used in moderation and with plenty of water, most of them are not injurious.  
Carelessness can be an additional cause of many scratches and stains. Scraping or banging metal utensils in the kitchen sink gradually will scratch and dull the surface. The finish is then more susceptible to stains which become increasingly difficult to remove.  
TIPS FOR FIXTURES  
Don't let food wastes accumulate in the sink.  
Don't use bathtubs, basins or sinks as catch-alls for paint cans, trash or tools when redecorating.  
Never step into a bathtub with shoes on. Shoe soles carry hundreds of gritty particles which can scratch the enamel.  
Don't use sinks or wash basins as receptacles for photographic developing solutions. They leave permanent stains.  
By giving them proper care, your fixtures and porcelain surfaces will retain their newness and lustre indefinitely. But once the damage has been done, the best plumber in town can't restore the original finish.  
Use Naptha Soap—  
Here are a few suggestions for removing fixture stains:  
Most stains are caused by dirt, grease, rust, or the minerals in your water supply. To clean any plumbing fixture, regardless of whether it has an acid-resistant surface, place up half a bar of naptha-based soap in a quart of hot water. Add two tablespoons of paint thinner or dry-cleaning solvent. Apply this solution to the surface with a stiff-bristled brush to remove most simple stains.  
Paint, rust, acids, and other stains are more complicated to remove and must be handled differently to avoid damaging the fixture's surface.  
Hardened paint spots may be removed with a razor blade. Be very careful to use the blade at an angle to avoid scratching the surface. After most of the paint has been scraped off, the remainder can be removed with benzine, dry-cleaning fluid, or an ordinary household cleaner and water.  
Rust occurs mostly from leaving wet metal utensils upon the surface of the sink. To remove this type of stain, make a solution of one part of muriatic acid in 10 parts of water. Be sure to use rubber gloves to protect your hands. Apply the solution with a cloth. Wash the surface with water thoroughly and promptly after the rust disappears.  
Care should be taken to prevent solutions of this type from coming in contact with chromium-plated fittings, since even a brief contact will pit the chrome. Muriatic acid should be used only on acid-resistant fixtures. All modern kitchen sinks, vitreous china fixtures such as water closets and colored enamel or porcelain have acid-resistant qualities.  
Food stains, usually from food, may be removed with a paste made of peroxide and equal parts of cream of tartar and household cleaner. Let the paste remain on the stain for 10 to 15 minutes before washing off.

## You'll pick 'em for style Bless 'em for comfort

And at prices like these, you'll want two pairs instead of only one!

"Low scores... Top value... here's my choice in a real golf shoe!"  
Firm but flexible. Gives support where you need it. Removable spikes. An unusually good buy at \$99.95.
