Councillor Urges Sub-division Developer to Provide for Industrial Assessment

Ward 4 councillor, Ross Deakin has suggested that no further residential subdivisions should be approved in the Township of Pickering unless an adequate percentage of industrial assessment is provided by the developer. Mr. Deakin urged Council to adopt this policy when he introduced the subject at a regular meeting on Monday night. He pointed out that this practice had been adopted in at least one other neighbouring municipality with considerable success.

Reeve Sherman Scott agreed that the motion could be approved in principle and the individual details could be worked out at a future date. "I feel that some type of industrial tie-up should be arranged," said councillor Deakin. He charged that township advertisements in foreign magazines or by brochure was merely a waste of money. Councillor Edgar James suggested that the policy might tend to deter future developments in the small hamlets like Greenwood and Whitevale. He contended that some exceptions would have to be made in individual cases. Reeve Scott pointed out that the motion would be approved only in principle. He warned, however, that proposed subdivisions in the north end of the township should be considered even more carefully than proposals for the south. On a recorded vote, councillor Spang took the lone negative stand.

Referring to the "Bay Ridge" development at Frenchman's Bay, Reeve Scott stated that approval had not yet been received from the Water Resources Commission. "Until we obtain water and sewers, we are no further ahead than we were two years ago," stated the Reeve. "When the plan is registered, we'll have some idea where we're going," he concluded.

Taxes Increased Six Cents

A Whitevale man who had charged that there had been an abnormal increase in his taxes, filed a verbal complaint with Pickering Township Council at a special meeting last week. It was reported this week that the property of Richard Tweedie showed a tax increase of only six cents since 1957. At that time the amount was \$42.68 for his 7.05 acres. In 1960 it was \$42.74 for a similar acreage. "Compared to some of the increases I've heard about in the past weeks, it's rather minor," commented Reeve Sherman Scott. "How it didn't warrant more of an increase, I wouldn't know."
