**OIL SPACE HEATER**

Model 18A  
For the average home, extra heating capacity and fine appearance insure satisfaction.

- Modern Picture frame styling.
- New efficient heat exchanger designed to get more heat from the fuel you burn.
- Beautiful beige and gold finish which will harmonize with the decoration of your home.
- Sides of casing swing open for quick radiant heat when desired.
- Smoke pipe comes off top of casing so that heater takes up less floor space.
- Two speed circulator fan (optional) will push heat to cold floors and hard-to-heat corners.
- C.S.A. Approved.
- Choice of three beautiful models.

**Patrick Motors Show New Cars Today**

This week Neil Patrick Motors Ltd., in Stouffville, have on display the latest 1961 models of General Motors Pontiac and Buick cars. The general public is invited to visit the Patrick show room and inspect these latest GM creations.

One and a half inches shorter and 2 1/4 inches narrower than last year's models, the new Pontiac is completely restyled. Improved driver and passenger comfort is a major feature this year. Pontiac seats are higher, there is more headroom and entry to passenger compartments has been made much easier. Interior roominess has not decreased, despite Pontiac's smaller size.

A new windshield accentuates the car's trim appearance and also eliminates the "dog-leg" of former wraparound windshields. The triangular rear side window on four-door sedans has been eliminated as well.

Pontiac will offer 30 models in seven series — the Strato Chief, Laurentian, Parisienne, Catalina, Ventura, Star Chief and Bonneville. There will be eight different Pontiac station wagons offered.

Pontiac offers more than 30 solid Magic-Mirror exterior finishes and in two-tone combination of colors a selection in excess of 60. Blending with the exterior colors is a wide range of interior trim combinations in Jewel-tone Morrokide, nylon-faced and wool pattern cloths.

Automatic Drive, Standard on Buick

All models have clean, sweeping lines with little chrome. There is more head room and greater riding comfort. The transmission tunnel has been lowered.

Windshields have been restyled, and doors both front and rear, open wider for easier entry and exit. Interiors are more luxurious and there is a wide choice of decorator color schemes in leather, nylon and cordaveen.

Four V-8 engines are available. Each has a wide variety of aluminum alloy parts with a resultant weight reduction and efficiency increase for all Buick models.

transmission has been reduced six inches in length and 20 lbs. in weight through a new compact design. This permits substantial lowering of the floor tunnel. Automatic transmission is standard equipment on the LeSabre and all other series in the regular line.
