MAKE YOUR HOME COMPLETE WITH ELECTRIC HEAT

ECONOMICAL INSTALLATION

With flameless electric heating units, you don't have to extend or strain your present heating system. No duct work or expensive structural changes are required to provide maximum heating comfort in the added living space you're planning, because electric heating units operate entirely independently. Your qualified electric heating contractor can install them anywhere, at any time, quickly and inexpensively.

CAREFREE COMFORT

Flameless electric heating units provide the ultimate in heating comfort. With an individual thermostat in each electrically-heated room, you control both comfort and cost. Just set the exact heat you want, when you want it. . . turn it down when the room is not in use. Heat is provided almost instantly. . . no need to wait for heat to build up in a central system. Electric heat is as clean as light; produces no dust, no fumes, no products of combustion. The air is more healthful and drapes, rugs, walls stay clean longer.

LOOK AT THESE ADVANTAGES

With flameless electric heat no heat is wasted up a chimney. With individual thermostats there's no need to overheat the whole house to make one room comfortable. Weather and wind direction won't affect your comfort. It's the ideal answer for hard-to-heat areas in your present home. . . that cold bedroom, a draughty bathroom. Electric heating units can be installed anywhere, anytime, quickly, easily and inexpensively in a size and capacity exactly suited to your particular need.

THERE ARE MANY KINDS OF ELECTRIC HEATING UNITS TO CHOOSE FROM

BASEBOARD CONVECTION UNITS
Inconspicuous metal baseboard units replace wooden baseboards. Under windows, they eliminate cold draughts.

RADIANT WALL PANELS
Radiant heating units, mounted into wall or ceiling, beam warmth like the sun throughout the room.

ELECTRIC HEATING CABLE
Hidden in the ceiling insulated heating cable provides complete heating comfort.

FAN-TYPE HEATERS
These units provide fast heat recovery, ideally suited to rooms having only occasional use.

DO IT NOW! JAN. 29 TO MAR. 10

Electrical Contractors and Hydro are working together in conjunction with the Government's Winter Works program. Their efforts are aimed at making it easy for you to enjoy the advantages of electric heat without delay. Your Qualified Electric Heating Contractor is trained to serve you.
