with a NEW CO-OP BATTERY

The new Co-op Batteries containing Silver Cobalt are ideal for farm conditions. Silver Cobalt gives the same kind of protection to battery plates that galvanizing gives to iron. Silver Cobalt covers the plates and keeps the charge sealed in. It also prevents harmful deposits from forming on the outside of the plates. Consequently the Co-op Battery can sit idle for up to 6 months and still be ready to leap into action for you — ideal for the irregular driving conditions of farm tractors, trucks and of course your automobile.
