**GALA SKATING PARTY**

on Friday evening, March 29th, 1963 commencing at 8 p.m. in the Stouffville arena, Stouffville

ENTERTAINMENT - REFRESHMENTS - CHILDREN WELCOME

Be Sure To Bring Your Skates

(Sponsored by the York North Liberal Association)

**PUBLIC NOTICE**

*of vital importance to you*

Again in the Spring of 1963

Your Gas Company asks your assistance

The severe winter weather experienced this past year has created a deeper frost level than normal. When the frost "comes out", as milder temperatures prevail, ground movement will be greater than in other years.

The Works Departments of many municipalities have warned of the damage that has already occurred to streets and paving, and that more damage will take place. Repairs to broken roads, water mains, etc., cost thousands of dollars each year, and the estimates this year are greater than ever.

The many miles of gas mains buried in the ground, as well as sewer networks, hydro conduits and telephone cables have been installed and maintained for years in accordance with the best known engineering and operating practices. All of these facilities will be subjected to pressures and movement as the ground begins to thaw.

Where our new gas mains and service lines have been installed, refilled trenches will likely settle. Any resulting damage to lawns, walks, roads and driveways will be adjusted as quickly as weather permits.

Under these abnormal conditions the possibility of natural gas leakage is increased. The Gas Company therefore requests the assistance of all the citizens in the community in guarding against gas leaks that might otherwise go unnoticed.

Gas leak detecting crews constantly patrol the area, checking streets, utility manholes, sewers and buildings. In addition to this safeguard we ask your co-operation by reporting ANY UNFAMILIAR ODOUR to us promptly. In addition any of the following circumstances should be reported without delay:

1. Any noticeable bubbling in pools of water on the ground and streets.
2. Any odour which has no readily apparent cause, either in buildings or out of doors.
3. Any indication that your furnace, regardless of fuel, does not appear to be operating as it should.

Basement floor drains should be checked to ensure that they contain water. Sewer gases, natural gas and other combustible fumes can enter homes through basement drains if they are dry. Pour a pail of water into dry cellar floor drains to fill the water traps and prevent the entry of gases.

Your participation in this safety program is appreciated. Please assist us in rendering the best possible service by reporting ANY STRANGE ODOUR to us quickly at any time of the day or night.

**County Hay Shortage**

(A. A. Wall, Agricultural Representative York County.)

One of the exhibitors at the Hay Show last week had a good comment on his hay supply. He said he felt gully taking part of a bale for the show, away from his cows, when he had so little left.

Hay supplies are low all over the country. Along with this, seedings didn't do well last summer, so that the hay crop this year may be light too. Where a farmer loses a catch, he may want to sow an annual crop this spring that can be used for hay.

Oats can be used for hay fairly well. They have two faults though. One is that they are hard to harvest and handle in the field. The other is that the protein content is low compared to good mixed hay. A fairly old idea can be used to overcome both of these faults. Seeding peas with the oats is a sound idea. The mixture of two bushels of oats with one bushel of peas, will give feed about equal to good mixed hay.

Corn, of course, will also save the day, when the hay crop is short. Plans this spring should include enough to assure a full silo.

Where a shortage of pasture is expected, Sudan grass will do well too, and both of these crops do better alone than mixed with oats.

I don't like the idea of growing an annual crop for pasture, because it's so much more expensive than perennial forages. But it's even more expensive, to be short of pasture in the middle of the summer.

I'm probably rushing the season, thinking of seeding, with snow still on the ground, but some things should be worked out well ahead of time. Another thought concerns insect control. I always get quite a few calls after the spring crop is up about wireworm damage. With this one, by the time you see the damage, it's too late to save the crop. Seed treatment is the only control, and the regular treatment of Panogen doesn't protect against wireworms at all. Where there is any suspicion of wireworms, seed should be treated with a special material containing aldrin or lindane. Grain or corn, following sod, are most susceptible.

**Report on York County Seed Fair**

(A. A. Wall, Agricultural Representative York County.)

The importance of quality gets top rating in every industry these days. Any business that doesn't give priority to the quality of its product is bound to lose the battle.

I thought there was lots of evidence that farmers are quality conscious, at the York County Seed Fair and Hay Show, held last week. There were lots of hay samples that looked as fresh and green as the day the crop was cut. There isn't any doubt that this kind of feed is the key to making livestock produce well, and economically.

Competition at the show was good this year, with over 100 entries. Eugene Lemon, of Stouffville won the championship in the grain classes and was awarded the Newmarket Co-op special prize. Donald Bagg of Woodbridge was the champion in the hay division, winning the Maple Seed Mill award.

Other first prize winners were Archie Cameron, Woodbridge; Bill Staines, Queensville; Bruce Snider, Maple; Alex Davidson, Agincourt; Walter Burkholder, Pickering; and Oliver Bales, Newmarket.

Walter Burkholder won top prize for corn and was presented with the traditional gold watch awarded by the York County Crop Improvement Association, sponsor of the show.

D. L. Parks, Director of the Field Crops Branch of the Department of Agriculture, was the guest speaker. Weed control, fertility and good seed were all stressed in his talk as the most effective weapon for top crop yields.

Oat varieties recommended this year were Russell, Garry and Rodney. For barley, York, Herta and Brant were suggested as the varieties best for the job.

**BETHESDA**

Mr. and Mrs. Clarence Atkinson, Mrs. A. Gibson and Misses Selena and Flossie Atkinson were guests at the dinner given Wednesday evening of last week by the family of Mr. and Mrs. Chas. Atkinson, at the Summit, in honour of their Golden Wedding Anniversary.

Leary, Miss Ruth Hoover and Mrs. Williams were visitors with Mrs. Chester Patterson for lunch and a quilting, Thursday of last week.

Mr. and Mrs. Clarence Doner were Friday night dinner guests with the Pattersons.

Miss Margaret Wideman is among those graduating from the Ontario Mennonite Bible School at Kitchener on Thursday, March 28. Those expecting to attend the exercises are Mr. and Mrs. Jacob Wideman, Mr. and Mrs. Carl Wideman and Mr. and Mrs. Harvey Wideman.

Mr. and Mrs. Clifford Burkholder attended the Baccalaureate service Sunday afternoon in Guelph at the Ontario Agricultural College for the graduating class of 1963 of which Gordon is a member.

Friends of Mr. and Mrs. Arthur Paisley gathered at the home of Mr. and Mrs. C. Burkholder on Saturday night to honour the Paisleys on the occasion of their thirtieth wedding anniversary. Present were: Mr. and Mrs. H. Pugh, Mr. and Mrs. A. Steckley, Mr. and Mrs. Harry Clendenning and Elaine, Maurice Pike, Mr. and Mrs. E. Keffer, Miss Alma Burkholder, Misses Helen and Marjorie Nicely.

There was a large attendance at the ratepayer's meeting held at the school house, March 21. The proposal of the annual school meeting to add a complete new room to the school was rejected and the board advised to proceed with plans for new wash rooms. An architect preparing plans which must first be approved by the board, then the Public School Inspector, the Medical Officer of Health and the Department of Education before being submitted for tenders.

**IMPORTANT MEETING**

We cordially invite all farmers in the district to attend a meeting on

**WEED CONTROL**

with colour slides and a feature film—

**"CROPS NOT WEEDS"**

Your host — T. L. Wilson, Whitevale.

**PROGRAMME**

- Farm Weed Control Program for 1963.
- Bruce Collins of Howard Chemical Company.
- Killing Weeds in Legume Crops.
- Bill Long of May & Baker (Canada) Ltd.
- Panel Discussion.

Date — Wed., April 3rd at 8 p.m.

Place — I.O.O.F. Hall, Whitevale

Refreshments will be served — Door prizes.

**GEORGE TIMBER'S TIPS ON HOW TO MARKET YOUR HOGS EARLY**

Cutting down on time to market and feed to market means greater hog profits. One of the surest ways to put down your total feed cost is to creep feed your baby pigs with Purina Baby Pig Chow and Purina Pig Startena.

Get your baby pigs away to a flying start without setback with these "Fast-Start Twins." They supplement the sow's milk and contain built-in vitamins, minerals, and antibiotic fortification needed for fast sturdy growth.

Creep feeding your baby pigs with Purina's "Fast-Start Twins" takes advantage of their early urge-to-grow. This is important to you because it lets you take advantage of their early feed converting efficiency. It takes less than 2 pounds of feed to put on a pound of gain when they're young. As your pigs grow older, they just can't make as efficient gains at such low cost. Give your baby pigs a quick start on the road to market by creep feeding Purina Baby Pig Chow and Purina Pig Startena. You'll increase your profits by sending more pigs per litter to market, and you'll keep up the sow's condition, too.

See us about the complete Purina Hog Program—the Program which helps hog growers produce more Grade A pork at low cost—at the Store with the Checkerboard Sign.

for fast, efficient feed service call

**STOUFFVILLE CO-OP**
