TIPS

ON HOW YOU CAN GET THE MOST FROM YOUR GRAIN

You do not get full value from your home grown grain when it alone is fed to poultry and livestock. Grain alone lacks a variety of proteins, vitamins and trace minerals required for efficient poultry and livestock nutrition. Purina concentrates plug these nutritional gaps to give you top profit feeding.

For instance, feeding tests show that hogs will gain almost half a pound a day more, and take up to 35 lbs. less feed to gain a hundred pounds when home grown grain is balanced right as opposed to when it is balanced only half right.

This is where our Check-R-Mixing Service can help you get the most from every bushel! Our Purina Check-R-Mix service is custom grinding and mixing of your grains with Purina Research tested concentrates. It makes no difference how much grain you bring

in... or what kind... or what livestock or poultry you want to feed. Our mixer-man's Check-R-Mix manual has all the formulas to help him use the right amount of Purina concentrate to help you get all the meat, milk, eggs... and PROFITS your grain will deliver.

Let us mix you a research backed Check-R-Mix ration to fit your situation. Why not talk it over the next time you're in town or just give me a call.
