Wants Zone Meetings For Councillors To Talk To Markham Twp. Ratepayers

Markham Township Councillor Cleary Palmer thinks it's high time "to clear the air and give the people an understanding of what is going on and why there have been so many split votes by township council."

With these words Councillor Palmer introduced his surprise on each member to organize a "township council night" to enable ratepayers to know just where they stand on vital issues.

Councillor Palmer said later he was "becoming quite concerned with the number of split votes we've been having and the way council's business has been run generally. It's getting so we would have a split vote on whether to have a cup of coffee."

He felt that ratepayers in general were presently confused at just what direction the township is going and the way it's getting there.

"I feel these meetings in each of the wards," he said, "would give each member a chance to stand up and present his views and let the ratepayers know just where he stands."

He stated it was his firm opinion that councillors should vote for what "they believe in and not just go looking for votes in the next election."

Your M.P. Reports

By Michael Starr, M.P.

The Budget was brought down on Monday evening, March 16th, by the Honourable Walter Gordon, Minister of Finance.

The date of the Budget was a little earlier than usual and it brought forth some speculation as to the reason for this early date. The most logical speculation is that the Government wanted the Budget revealed prior to the Dominion-Provincial Conference slated for March 31st. They would then be in a position to say to the Provinces that they were unable to come to their assistance financially, due to their own fiscal position.

The Budget was not spectacular. The Minister noted that the upswing which began in 1961 continued and the prospects were that 1964 would be a good year.

Unemployment continued to decrease, following the pattern which began in 1961 and employment was increasing. All of the policies of the former Government were retained and they have had a favourable effect upon the economy.

Deficits are still being maintained, even though the promises at election time were made on balanced budgets.

The 11% sales tax imposed last year on building materials and production machinery is being applied and no retreat from this tax was made. Four percent of this tax has been in effect and an additional four percent will be added to the purchase price on March 31st of this year. The remaining three percent will come into effect December 31st, 1964.

This tax is bound to have an adverse effect in the construction and manufacturing areas.

Some manufacturers are planning to move south of the border as the result of this tax. This means less jobs in Canada and works in reverse to what we are trying to achieve.

There is also the possibility of a slow-down in house building this summer, because of the additional tax and because many homes were built this past winter in order to qualify for the \$500 bonus offered by the Government for constructing homes in the winter months.

The Budget provided no change in liquor and tobacco tax rates except for some tax easement allowing Scotch whiskey to enter Canada in 25 ounce bottles.

There is a provision for the deduction from taxable income of tuition fees paid by part-time students, if exceeding \$25 annually. I wonder how many of these make enough to even pay income tax.

Budget was the extension of family allowances to the students attending school full-time in the ages 16 and 17. Provision is made to pay them \$10.00 a month. This should be an incentive to continue school and achieve a completed education. This is so necessary in this technical age.

Over-all tax cuts were completely rejected by the Minister of Finance and, instead, an additional income tax of 1% effective January 1, 1964 is now being paid by Canadian taxpayers and, as well, additional sales taxes are being levied through the purchases of building materials and production machinery.

45 DIFFERENT MODELS OF CARS

Why one stop at your Chevrolet dealer's is like having your own private auto show

And if we had room here we could go on and on and list all the engines Chevrolet offers, starting at the Chevy II's 90-horsepower 153 4-cylinder (it's the thriftest!) and ranging all the way up to the big Chevrolet's extra-cost 425-horsepower 409 V8 (it's the greatest!). We could wax eloquent about the choice of transmissions, and how they team up with those Chevy power plants to produce some of the going-est cars ever. Or the fact that you can have umpteen different exterior and interior color choices — enough, in fact, to allow some of our lady customers to have the sort of fun in buying and

choosing that they generally reserve for shoe stores. And all the models with bucket seats and all the models without — all of them comfortable as all get-out. And the hundreds — yes hundreds — of different extra-cost options. . . serious ones like Positraction and gay ones like the new AM-FM radio. But all that's best left to your Chevrolet dealer. The long and short of it is, he'll go to any length to show you exactly the kind and size and price of car you want — and exactly how reasonable that price can be for you to be able to enjoy so much more car.
