If you're thinking of trying to kick the smoking habit and find it difficult, think of the problem in terms of dollars and cents. If you smoked just a package a day, it would cost: 46 cents a day, \$3.22 a week; about \$14.00 a month and over \$165. a year. Project that over about 40 years (if you don't get lung cancer first) and enough cash for a nice cottage on the lake will have gone up in smoke.

THIS FALL
Fertilize Hay and Pasture

THE CO-OP* BULK SPREADING WAY

Fertilizing Pays 6 Ways on Hay and Pasture

- | | |
|---|--|
| <p>1. STRONGER, MORE VIGOROUS STANDS
 Fertilization helps establish vigorous plants, improves first year yields, and "winterizes" legumes.</p> | <p>4. LOWER COST FEED NUTRIENTS
 Productive hay and pasture crops are the lowest cost source of feed nutrients. High yields will further reduce costs, and lessen the need for purchased feeds.</p> |
| <p>2. HIGHER YIELDS OF DRY MATTER & TDN
 Fertilizing every year boosts per acre yields and the production of Total Digestible Nutrients.</p> | <p>5. INCREASED MILK & BEEF PER ACRE
 Milk and beef production on well-managed, well-fertilized pastures show that per acre output can often be doubled or tripled.</p> |
| <p>3. BETTER PRODUCTION, YEAR AFTER YEAR
 Annual fertilization improves persistence, reduces need for frequent costly reseeding.</p> | <p>6. EXTRA CASH INCOME PER ACRE
 Forage fertilization can return as much as \$5 for every \$1 spent on fertilizers.</p> |
