SOLID GOLD TUB TO COST \$360,000

A pure gold bathtub is being cast in Tokyo.

The 130,000,000 yen (about \$360,000) tub is in the shape of an ancient ship with a phoenix figurehead. It will be installed soon in the Funabara Hotel in Izu Peninsula, central Japan.

And the charge for relaxing in the world's most expensive bath will be 1,000 yen (\$2.80) every two minutes.

"I wanted to do something no one else had thought of," said G. T. Ishikawa, owner of the fashionable 600-guest hotel.

A model of the bathtub of 22 karat gold has been prepared. Casting and manufacture of the six-foot-long two-foot-deep tub began in Tokyo in August.

"It's being installed in a large specially-built public bathroom tiled in gold with gold-coloured carpets," he says.

"The room alone has cost me 50,000,000 yen (about \$140,000)." Hotel guests waiting their turn for the tub will splash about in a community bath.

"Twenty people, men and women, will be permitted in the community bath at a time," Ishikawa said. "The gold bathtub will be alongside the community pool and as one person steps out of it another will step in."

"A special window has been installed through which people not wanting to take a bath can watch those in the community pool and gold bathtub.

"I'll charge 100 yen (28 cents) a look."

CANDY by Tom Dorr

IS THIS A COW?

A school teacher asked her classes to write an essay about the owl while correcting them picked out the following:

"The bird I am going to write about is the owl. The owl cannot see at all by day and at night is as blind as a bat."

"I do not know much about the owl so I will go on to the beast which I am going to choose. It is the cow. The cow is a mammal."

"It has six sides — right, left, an upper and below. At the back is has a tail on which hangs a brush. With this it sends the flies away so that they do not fall into the milk. The head is for the purpose of growing horns and so that the mouth can be somewhere. The horns are to butt with, and the mouth is to moo with. Under the cow hangs the milk. It is arranged for milking. When people milk, the milk comes and there is never an end to the supply. How the cow does it I have not yet realized but it makes more and more. The cow has a fine sense of smell; one can smell it far away. This is the reason for the fresh air in the country."

"The man cow is called an ox."

STUDENT EXCHANGE INVOLVES 100,000

A massive Confederation project to exchange secondary school students for an entire academic year to improve national understanding is being proposed by Gordon Aiken (PC — Parry Sound-Muskoka).

Mr. Aiken said his plan would begin with up to 100,000 students in the 1966-67 school year and grow in numbers each subsequent year. The program would be limited to students in their last three years of secondary school.

Those in their final year preparing to enter university could probably participate only during summer vacations but others could exchange homes and schools with fellow students in other parts of the country, he said.

The plan should be set up by the centennial commission with the federal government paying travelling expenses.

A straight home-to-home exchange would add no extra expense to a family, he said, and the province could agree to provide the education.

The centennial commission last summer began a student exchange program that is to grow in numbers until the centennial year. It involves two-week trips.

Helen: She actually asked you what your husband did for a living.

Grace: Yes, and I told her he had his own business and spent all his time minding it.
